BIRTHS.

The 32,109 births recorded during the quarter represent an annual birth-rate of 284 for every ten thousand of the estimated population, or 2·84 per cent.

In the Principal Town districts the births registered are equivalent to an annual rate of 301 per ten thousand persons; in the Large Town districts to a

rate of 304; in the Small Town districts to one of 284; in the Mainland-Rural districts to one of 245; and in the Insular-Rural districts to one of 213.

The births in Glasgow were in the proportion of 311 to every ten thousand inhabitants; in Paisley, in the proportion of 310; in Leith, 304; in Dundee, 297; in Aberdeen, 295; in Greenock, 289; in Edinburgh, 242; and in Perth, 216.

Of the 32,109 births, 2036 were illegitimate, being at the rate of 6·3 per cent., or of one illegitimate in every 15·8 births. In the Mainland-Rural districts, 8·7 per cent. of the births were illegitimate; in the Principal Town districts, 6·2; in the Insular-Rural districts, 5·8; in the Small Town districts, 5·5; and in the Large Town districts, 5·0 per cent.

A comparative statement of the rate of illegitimacy in the divisions and counties of Scotland appears in Tables I. and II. Table I. shows that the highest rates occurred in the North-Eastern and Southern divisions, and Table II. that in seven of the counties the rate was over 10 per cent. The highest rate in any county occurred in Elgin, viz., 17·6 per cent.; and the lowest in Shetland, viz., 1·5 per cent.

Of the 32,109 births registered, 16,551 were of males, and 15,558 of females, so that there were born 106·4 of the former to every 100 of the latter. 1128 births were recorded during January, being at the rate of 359 daily; 9723 during February, or 347 daily; and 11,258 during March, or 363 daily.

In the Principal Town districts the mortality was at the annual rate of 198 per ten thousand of population; in the Large Town districts, it was 181; in the

Small Town districts, 175; in the Mainland-Rural districts, 172; and in the Insular-Rural districts, 169.

In Glasgow the death-rate was 213 for every ten thousand inhabitants; in Dundee and in Aberdeen, 211; in Greenock, 201; in Leith, 200; in Paisley, 183; in Edinburgh, 182; and in Perth, 175.

Of the 20,931 deaths registered, 10,420 were of males, and 10,511 of females. During January, 8093 deaths were recorded, being at the rate of 261 daily; during February, 6139, or 219 daily; and during March, 6699, or 216 daily.

MARRIAGES.

The marriages recorded in Scotland during the quarter having amounted to 7727, the rate was 68 for every ten thousand of population, or 0·68 per cent.

The marriage rate in the Principal Town districts was 78 per ten thousand inhabitants; in the Large Town districts it was 74; in the Small Town districts 68; in the Mainland-Rural districts, 47; and in the Insular-Rural districts, 48.

In Glasgow 87 marriages were recorded for every ten thousand persons; in Dundee, 83; in Perth, 82; in Aberdeen, 80; in Paisley, 78; in Edinburgh, 71; in Leith, 61; and in Greenock, 59.

During January 4101 marriages were recorded, being at the rate of 132 daily; during February, 1709, or 61 daily; and during March, 1917, or 62 daily.

INCREASE OF POPULATION AND EMIGRATION.

The births for the quarter having amounted to 32,109, and the deaths to 20,931, the natural increase of population, not allowing for changes caused by emigration or immigration, was 11,178. No reliable estimate as to the number of immigrants can be formed, but with regard to emigrants it is found from returns furnished by the Board of Trade that the number of these for the quarter was 78,697, of whom 33,948 were English, 5398 Scottish, 4186 Irish, 33,442 Foreign, and 1723 whose nationality was not distinguished, but of whom it may be assumed that 121 were Scottish. If then 5398 + 121, the number of Scottish emigrants, be deducted from the number representing the excess of births over deaths, 5659 remains as the approximate increase of the population during the quarter.

DISEASES IN THE ABOVE PRINCIPAL TOWNS.

As these towns contain fully 36 per cent. of the whole population in Scotland it may be assumed that the mortality from various diseases observed in them will give a fairly accurate indication of that which prevails in the surrounding districts.

The total deaths in these towns was 3291 in January, 2478 in February, and 2780 in March. Of these 259 in January, 192 in February, and 230 in March were from ill-defined and unspecified causes.

From the Acutely Infective or Specific Febrile diseases aftermentioned there resulted 292 deaths in January, being at the annual rate of 2·02 per thousand of the estimated population; 231 in February, or 1·77 per thousand; and 239 in March, or 1·65 per thousand.

One death from Small-pox was recorded in Glasgow during February. Measles accounted for 65 deaths in January, being at the rate of 0·45 per thousand of population; 52 in February, or 0·40 per thousand; and 51 in March, or 0·35 per thousand. From Scarlet Fever there resulted 17 deaths in January, or 0·12 per thousand of population; 23 in February, or 0·18; and 18 in March, or 0·12. To Hooping Cough were attributed 157 deaths in January, or 1·09 per thousand of population; 106 in February, or 0·81 per thousand; and 137 in March, or 0·95. Diphtheria caused 29 deaths in January, or 0·20 per thousand; 21 in February, or 0·16; and 18 in March, or 0·12. To Fevers were ascribed 24 deaths in January, or 0·17 per thousand of population; 28 in February, or 0·21; and 15 in March, or 0·10.

From the Diarrhœal diseases there resulted 32 deaths in January, being at the annual rate of 0·22 per thousand of population; 30 in February, or 0·23 per thousand; and 35 in March, or 0·24 per thousand.

Venereal diseases caused 13 deaths in January, 9 in February, and 12 in March.

Alcoholism accounted for 21 deaths in January, 11 in February, and 13 in March.

From Carcinoma, Sarcoma, and Cancer there resulted 126 deaths in January, giving a rate of 0·87 per thousand of population; 119 in February, or 0·91 per thousand; and 129 in March, or 0·89 per thousand.

The deaths from Pulmonary Tuberculosis and Phthisis amounted to 268 in January, being in the proportion of 1·85 to every thousand of population; 225 in February, or 1·72 per thousand; and 259 in March, or 1·79 per thousand.

Developmental diseases of infancy and childhood caused 155 deaths in January, 120 in February, and 128 in March.

Diseases of the Nervous system accounted for 198 deaths in January, 138 in February, and 190 in March.

To diseases of the Respiratory system were attributed 728 deaths in January, 458 in February, and 514 in March. Of these, Croup was the cause of three in each month; Bronchitis of 333 in January, of 185 in February, and of 195 in March; and the various forms of Pneumonia of 328 in January, of 221 in February, and of 256 in March.

To diseases of the Digestive organs 199 deaths were ascribed in January, 148 in February, and 204 in March.

To diseases of the Urinary system were assigned 92 deaths in January, 72 in February, and 83 in March.

Diseases of Pregnancy and Childbirth and other Puerperal conditions caused 24 deaths in January, 25 in February, and 17 in March.

From Violent causes there resulted 119 deaths in January, 101 in February, and 104 in March.

WEATHER.

The following remarks on the weather of the quarter are extracted from the Meteorological Returns which appear in the Registrar-General's Monthly Reports :—

January was characterised by a mean barometric pressure a little below the average, with a slightly high monthly range; a mean temperature about a degree below the average, with a mean daily range also below the average; a rather low mean humidity; a mean rainfall greatly above the average, and falling on three days more than the average number; a three days' excess of Easterly winds.

February was characterised by a mean barometric pressure, somewhat below the average, with a very high monthly range; an exceedingly high mean temperature, with a slightly high mean daily range; a low humidity; a mean rainfall nearly twice the average, and falling on three days more than the average number; a remarkable deficiency of winds from N. and E.

March was characterised by an exceedingly low mean barometric pressure, with a monthly range about the average; a somewhat high mean temperature,

with a slightly high mean daily range; an average humidity; a mean rainfall more than twice the average, and falling on twelve days more than the average number; a remarkable excess of strong winds, from S. and S.W.

The mean height of the barometric column, reduced to sea-level and 32° Fahr., was 29·746 inches in January, 29·745 inches in February, and 29·512 inches in March. The mean temperature was 39°·9, being 1°·9 above the average mean temperature for the quarter during the ten years immediately preceding. The mean temperature during January was 36°·5; during February, 42°·2; and during March, 41°·1. The absolutely highest temperature was 55°·0 in January, 59°·0 in February, and 57°·8 in March; and the absolutely lowest temperature was 1°·0 in January, 22°·8 in February, and 22°·0 in March. Rain fell on 19 days in January, on the same number of days in February, and on 25 days in March; the mean depth amounting to 6·04 inches in January, 6·10 inches in February, and 5·96 inches in March. Observations of wind direction being made twice daily, winds with an easterly point were recorded 14 times in January, 5 in February, and 9 in March. Westerly winds were observed on 32 occasions in January, on 40 in February, and on 40 in March. Observations of northerly winds amounted to 12 in January, to 9 in February, and to 7 in March. Southerly winds were reported 28 times in January, 26 in February, and 36 in March.

N.B.—Districts containing Parliamentary or Royal Burghs are printed in capitals, thus—EDINBURGH. Districts containing Police Burghs or Towns of 2000 Inhabitants and upwards are printed in small capitals, thus—Carluke. An asterisk "*" is prefixed to those Districts which have different names from the Parishes in which they are situated, or which comprise more, or parts of more than one Parish. The component parts of these Districts will be found on page 45. A dagger "†" is prefixed to those Districts which consist of only a part of the Civil Parish of the same name.

‡ Return not received. The numbers given are those for the corresponding quarter of last year.

SHOWING THE STATIONS
of the
SCOTTISH METEOROLOGICAL SOCIETY.
Reported to the Registrar General of Scotland.

NOTES ON THE NUMERICAL RETURNS OF SCOTTISH METEOROLOGY FOR THE QUARTER ENDING 31st MARCH 1903.

By Dr BUCHAN, under the Direction of the Council of the Scottish Meteorological Society.

THESE returns are founded on the observations made, morning and evening, at 60 of the Stations of the Scottish Meteorological Society, and have been prepared from the Observers' separate schedules.

From the individual results for each station, the following collective results have been obtained, assuming them to have been equally well observed, and to represent the whole country :—

COLLECTED RETURNS FOR ALL THE ACCEPTED STATIONS OF THE SCOTTISH METEOROLOGICAL SOCIETY, HAVING A MEAN LATITUDE = 56° 33′ N.; MEAN LONGITUDE = 3° 45′ W.; AND MEAN ELEVATION =279 Feet.

JANUARY 1903—

Hence the weather of JANUARY 1903 was characterized by a mean barometric pressure a little below the average ; a mean temperature somewhat below the average, with a slightly low mean daily range ; a rather low mean humidity ; a mean rainfall greatly above the average, and falling on 2 days more than the average number ; a mean wind force above the average, with a slight excess of westerly winds.

The mean barometric pressure was 29·746 inches, or 0·050 inch below the average. Pressure was very low from the 1st to the 10th, high from the 11th to the 21st, and low thereafter. The extremes at Leith were, at sea-level, 30·635 inches on the 13th and 28·732 inches on the 7th.

The mean temperature of the month was 36°·5, or 0°·7 below the mean, the days being 0°·9 and the nights 0°·4 below their respective averages. In Shetland, Orkney, and along the East coast the difference from the average was very slight, whilst in inland districts there was a well-marked deficiency which at a few places exceeded 1°·5. In the south the deficiency was less than 1°. The first week of the month was extremely mild, but on the evening of the 10th a very severe frost set in, reaching its greatest intensity on the 14th and continuing until the 17th. Thereafter the weather became very mild and remained so until the end of the month. The difference between the temperature at the middle of the month and during the last week was very great. Thus at Leith the mean temperature of the week ending on the 17th was 31°·0, whilst for that ending on the 31st it was 46°·7. The corresponding temperatures were for Glasgow, 28°·3 and 45°·2, for Fort William, 29°·9 and 45°·6, and for Braemar, 23°·9 and 41°·3. The absolutely highest temperature was 55°·0 at Crathes on the 30th, and the lowest 1°·0 at Braemar on the 13th.

The mean rainfall was 6·04 inches, or 56 per cent. above the average, being the largest January rainfall since 1877. At Glasgow and Paisley the total for the month exceeded, and at Edinburgh, Leith, Lednathie and Fort Augustus closely approached twice the average. The excess was equal to only 10 per cent. at Deerness, but in the mainland was everywhere well-marked. From the 11th to the 20th hardly any rain fell, whilst the first and last ten days of the month were very wet, many daily amounts exceeding an inch being recorded, the heaviest falls occurring on the 9th and 29th. At Glencarron 3·15 inches fell on the 29th and 2·14 on the 30th, the total for these two days being 3·61 inches at Fort Augustus and at Fort William, where the daily fall exceeded an inch on 7 days, 4·00 inches. The heavy falls on the 9th were largely made up of snow and sleet and were accompanied by an easterly gale. The monthly rainfall on Ben Nevis was 33·45 inches, the greatest daily fall being 4·78 inches on the 29th.

On the 9th a severe snow-storm was general over the country, and blocks occurred on the Highland railways.

During the last ten days of the month strong westerly winds, occasionally reaching gale force, prevailed, while owing to the heavy rains and melting snow many rivers were by the 28th in full flood.

On the 26th lightning, and on the 27th thunder, was reported generally in the North and West.

FEBRUARY 1903—

Hence the weather of FEBRUARY 1903 was characterized by a mean barometric pressure considerably below the average ; a very high mean temperature, with a slightly high mean daily range ; a rather low mean humidity ; a mean rainfall twice the average, and falling on 4 days more than the average number ; a mean wind force above the average, with a great excess of winds from W. and S.W.

The mean barometric pressure was 29·745 inches, or 0·105 inch below the average. The distribution of pressure was remarkable, an exceedingly steep gradient being formed from S.W. to N.E. Thus the mean for the month at Cally (Gatehouse) was, at sea-level, 29·881 inches, whilst that at North Unst was 29·423 inches, giving a gradient of 0·423 inch against a normal gradient of 0·168 inch. Strong winds from W. and S.W., frequently reaching gale force, blew on 6 days more than the average number, and the month was characterized by a succession of deep depressions passing from S.S.W. to N.N.E. The deepest of these occurred on the 27th, and at 7 a.m. on that day the barometer at Leith fell, at sea-level, to 28·244 inches.

The mean temperature was 42°·2, or 3°·9 above the average, the days being 4°·1 and the nights 3°·6 above their respective averages. Except in 1882, when the monthly

mean was 42°·3, no February temperature so high has been recorded at least since 1856. Several places in the South had a mean temperature fully 5° above the averages, whilst in Orkney the excess was slightly above 2°, and at North Unst and Monach about 1°. The warmest day of the month was at most places the 19th except in the South where it was generally the 9th. The coldest days of the month were the 1st, 13th, and 28th; but very little frost was reported and at some stations the sheltered minimum did not fall to 32°. The absolutely highest temperature was 59°·0 at Gordon Castle on the 19th, and the lowest 22°·8 at Lednathie on the 26th.

The mean rainfall was 6·10 inches, or double the average, being the heaviest February rainfall on record except that of 1894 when the mean amount was 7·05 inches. In Aberdeenshire the amount hardly exceeded the average, but in all other parts of the country there was a remarkable excess which was at few places less than 60 per cent., at many more than 100 per cent., and at a few more than 150 per cent. At Fort-William the daily amount was an inch or more on 8 days, and the total for the month was 16·46 inches. A great storm of snow, sleet and rain occurred everywhere on the 8th, and in the West on the 7th also. Thus at Greenock the total for these two days was 5·35 inches, at Paisley 4·80 inches, whilst at Leadhills the total for the first nine days of the month was 6·69 inches. Destructive floods were general throughout the country and on the 10th the river Clyde burst its banks at Rutherglen. During the last ten days of the month also heavy rains occurred, 8·57 inches being recorded at Fort-William from the 19th to 28th inclusive, and 7·67 inches at Glencarron. On Ben Nevis the total rainfall was 36·24 inches, being 22·70 inches above the average of nineteen years.

On the 1st and 8th snow fell at many places and from the 21st to 28th storms of hail and snow accompanied by lightning and occasional thunder were frequent in the West.

The month was characterized by frequent gales from the S.W. These were in most districts almost continuous from the 19th onwards, a very destructive gale on the 27th being of unusual severity.

Between the 20th and 25th thunder was occasionally reported in the North and West.

MARCH 1903—

Hence the weather of MARCH 1903 was characterized by an exceedingly low mean barometric pressure; a somewhat high mean temperature, with a slightly low mean daily range; a mean humidity slightly below the average; a mean rainfall more than twice the average, and falling on ten days more than the average number; a mean wind force above the average, with a remarkable excess of winds from between S. and W.

The mean barometric pressure was 29·512 inches, or 0·310 inch below the average. This is the lowest mean pressure recorded for March since 1876, when the mean for the month was 29·394 inches. The month, like February, was characterized by a succession of cyclonic disturbances, which passed rapidly Northwards just off the West coast of Scotland and caused stormy weather throughout the entire month. A well-defined gradient was formed for winds from a S.W. quarter which prevailed on no less than 9 days more than the average number. At Leith the barometer, at sea-level, rose above 30 inches on only the 8th, 14th and 31st, the extremes there being 30·205 inches on the 8th, and 28·629 inches on the 2nd.

The mean temperature was 41°·1, or 1°·7 above the average, the days being 1°·3 and the nights 2°·0 above their respective averages. In the Southern counties the excess was generally more than 2°, whilst in few parts of the country was it less than 1°. During the first week of the month temperature was somewhat below the average, but thereafter it remained continuously above, the maximum generally being registered on the 22nd, 25th, or 31st. At Greenock, Glasgow Observatory, and Leith the sheltered minimum did not fall to 32°. The absolutely highest temperature was 57°·8 at Corstorphine on the 20th, the lowest being 22°·0 at Kingussie and at Lednathie on the 7th.

The mean rainfall was 5·96 inches, or 110 per cent. above the average, being considerably the largest March rainfall on record since observations were organized in 1856. In 1861 and 1876 the mean was 5·10 inches and in only five other years has the mean exceeded 4 inches. The number of rainy days was as notable as the abnormally heavy rainfall. At Dumfries, Greenock and a few other places rain fell on every day of the month, and only at a few places, and these all on the East coast, was rain recorded on fewer than 20 days. In the extreme South-East of the country the rainfall was about the average, in a great part of Aberdeenshire and in Banffshire there was a well marked deficiency, and in the Eastern half of Sutherlandshire the amount was either a little above or a little below the normal. In all other parts there was a very large excess, the amounts being usually much more than twice, and at several places considerably more than thrice the average. The heaviest rainfalls were, in inches, 20·99 at Glenquoich, 18·31 at Stronvar, 16·49 at Leadhills, 15·90 at Fort-William, and 12·56 at Greenock. On Ben Nevis the total rainfall was 37·96 inches, being 23·47 inches above the average of nineteen years.

Snow in small amounts was general during the first six days and also during the last week of the month. Hail was very frequent, and thunder was reported from a few places on the 4th, 5th or 26th. The month was characterized by very high winds from the S.W., frequently reaching gale force during the latter half of the month.

REGISTRARS' NOTES.

In compliance with the following Instructions, many of the Registrars have appended remarks to their Returns, from which the subjoined Notes have been selected. The Registrars alone must be considered responsible for the opinions which they express.

INSTRUCTIONS TO REGISTRARS.

"If, at any time, the Births (whether legitimate or illegitimate), the Deaths, or the Marriages registered during the Quarter have been above or below the average, here state what you consider to be the cause, and whether epidemics, such as Measles, Typhus, Cholera, etc., have prevailed in the District; or if there is any other fact in the character of the Weather, Sanitary or Social Arrangements, Movement of the Population, etc., which will account for the circumstance."

The Figures refer to the Numbers of the Districts in the preceding Tables.

I. NORTHERN DIVISION.

1. Shetland.

6 (1). Mid and South Yell.—Weather exceptionally wet. Influenza and Hooping-cough prevalent.

2. Orkney.

16. Evie and Rendall.—The four deaths in March were caused by Influenza.

26. Sanday.—All the deaths except one were of old people. Weather exceptionally stormy and wet.

3. Caithness.

63. Dunnet.—The two persons who died were aged respectively 81 and 93 years.

41. Thurso. — Four of the deaths were of persons over 70, seven over 80, and one over 90.

4. Sutherland.

53. Lairg. — Death-rate abnormally high. Eight of the twelve deaths were of persons whose average age was 82 years.

54. Loth.—The death recorded in January was that of the late Registrar, who had held the office since the Registration Act came into operation in 1855.

II. NORTH-WESTERN DIVISION.

5. Ross and Cromarty.

Mainland.

58 (1). Applecross.—Two of the five deaths registered in January were the result of accidental drowning.

70. Kiltearn.—Influenza very prevalent, but no deaths therefrom.

82. Tain.—Of the deaths registered seven were of persons aged 80 years and upwards, the oldest being 102.

Insular.

88. Stornoway.—The high death-rate is due to a severe epidemic, in the rural districts of the parish, of Influenza and Broncho-pneumonia.

6. Inverness.

Mainland.

95. Daviot and Dunlichty. — The death-rate is abnormally heavy. Four of the seven deaths were caused by Influenza, with Pneumonia supervening. Three deaths occurred in one family within three weeks.

Insular.

114 (1). Portree.—Five of the eight deaths were of persons aged between 73 and 84.

119. Strath.—Three of the deaths were of men accidentally drowned by the upsetting of a small boat, when securing the anchorage of a schooner.

III. NORTH-EASTERN DIVISION.

8. Elgin (or Moray).

130. Drainie. — One death resulted from accidental drowning, and another from suicide by strangulation.

131 (1). Burghead.—The death registered in February resulted from drowning.

131 (2). Duffus.—Six persons died aged respectively 76, 80 (two), 87, 88 and 93 years.

139. Knockando.—Deaths much below the average. The three persons who died were aged respectively 72, 79 and 81.

9. Banff.

159. Keith.—The heavy death-rate is attributed to the soft, changeable weather. The deaths were principally of old people and infants.

161. Marnoch.—Deaths above the average, due to an epidemic of Measles.

10. Aberdeen.

172. Auchindoir.—Of the five deaths three were of persons aged over 74 years, the oldest being 80.

180. Clatt.—Three of the five births and the three deaths were those of triplets who died within four days of their birth.

185. Cruden.—Two deaths were caused by drowning, resulting from the wreck of a steamer.

188. Drumblade. — One death was that of a male aged 99 years.

197. Fyvie.—Measles very prevalent, but no deaths from that cause.

201. Glenmuick, Tullich, and Glengairn.—The death-rate is higher than any, for the same period, for thirty years. Influenza and Hooping-cough prevalent, deaths resulting from both causes.

205. Keig.—Of the five deaths recorded, one was a case of suicide and another that of a pedlar who was found dead.

217. Logie-Coldstone and Cromar.—Three of the four deaths were of persons aged respectively 82, 83 and 85 years.

224. Monymusk.—The three deaths registered were of men aged 81, 82 and 84 years respectively.

241. Strichen.—No marriages recorded, but at least three cases occurred in which parties resident within the district were married elsewhere.

11. Kincardine.

251 (2). Portlethen.—The death in March was that of a man accidentally killed by a passing train.

258 (1). Fetteresso. — Of the twenty-five deaths recorded, nine took place in the Combination Poorhouse, seven of which were of persons belonging to other parishes.

259. Fordoun.—Hooping-cough very prevalent and caused three of the eleven deaths.

260. Garvock. — An epidemic of Hooping-cough occurred in March, but no fatal cases. School closed for four weeks.

IV. EAST-MIDLAND DIVISION.

12. Forfar.

276. Carmyllie.—The two deaths are those of infants one day old.

566. Inchinnan.—The death registered is that of the oldest inhabitant of the parish, a female aged 93.

569. Kilmalcolm. — Of the fifteen deaths registered, five were of persons residing in the Orphan and Consumption Homes of Scotland. One death resulted from accidental burns and one from drowning.

22. Ayr.

594. Girvan. — The deaths for March are much above the average. Seven were of children under five years, five of persons over 68, and three were caused by drowning.

607. Muirkirk.—Several deaths resulted from Hooping-cough and from Influenza followed by Pneumonia.

613 (2). Catrine.—Deaths above the average, due probably to the trying nature of the weather on the aged and infirm. Three of the persons whose deaths were recorded were over 80, and one was 97.

23. Lanark.

628. Cambusnethan.—Nine deaths were due to Hooping-cough and five to Influenza.

659. Wandell and Lamington.—The only death was that of a female 97 years of age.

660. Wiston and Roberton. — Two of the four deaths resulted from accidents, one by a revolver, the other on the railway.

VII. SOUTH-EASTERN DIVISION.

25. Edinburgh.

682. Currie.—An epidemic of Measles prevailed in Balerno during March. Of the eight deaths registered in that month, four were of children under 2 years and one was a case of drowning.

691. Lasswade.—One death resulted from a railway accident and another from exposure.

26. Haddington.

714. Oldhamstocks.—The ages of the three persons who died were 79, 82 and 85 years.

715. Ormiston.—Of the four deaths registered, two were of infants who lived only a few hours, and the other two of persons aged respectively 85 and 91.

717. Prestonkirk.—Of the fourteen deaths, four occurred in the County Combination Poorhouse.

720. Spott.—Two of the three deaths were due to premature birth.

27. BERWICK.

737. ECCLES.—Measles epidemic in west of parish during March. Eccles school closed in consequence.

740. FOGO.—The three deaths were of persons aged 82, 78 and 74 years respectively.

749. LEGERWOOD.—School closed owing to an epidemic of Scarlet Fever of a mild type.

750. LONGFORMACUS. — One case of Scarlet Fever.

753. NENTHORN.—The ages of the three persons who died were 74, 80 and 82 years.

28. PEEBLES.

767. NEWLANDS. — Influenza was very prevalent in January and the first half of February, but caused no deaths.

29. SELKIRK.

775. GALASHIELS. — Death-rate considerably increased by an epidemic of Measles.

III. SOUTHERN DIVISION.

30. ROXBURGH.

780. ANCRUM.—No marriages registered for nearly a year. A custom is growing for parties from the district to be married irregularly in Edinburgh.

785 (1). CAVERS.—Scarlet Fever of a mild type prevalent. One death therefrom.

799 (1). MELROSE.—Seven of the twenty deaths occurred in the District Asylum.

* The actual number of Districts is 1073—many Parishes and Burghs having been divided into two or more Districts for the purpose of Registration. Thus Edinburgh and Glasgow, to each of which only a single number is assigned in the Tables, consist of 6 and 14 Districts respectively. In forming the alphabetical arrangement the principle adopted has been to place *compound* names in the order in which they are pronounced.

REPORT.

During the quarter ending 30th June 1903, there were registered in Scotland 36,377 births, 19,020 deaths, and 8515 marriages. When these numbers are compared with the respective averages for the quarter during the ten previous years, as shown in Table III., the births and marriages are found to be above, and the deaths below the mean of the decennial period.

BIRTHS.

The births having, as stated, amounted to 36,377, the birth-rate was equivalent to 319 for every ten thousand of the estimated population, or 3·19 per cent.

In the Principal Town districts the birth-rate was 337 per ten thousand

persons; in the Large Town districts, 345; in the Small Town districts, 319; in the Mainland-Rural districts, 275; and in the Insular-Rural districts, 195.

The births in Glasgow represent an annual rate of 351 for every ten thousand of population; in Aberdeen, a rate of 337; in Paisley, 329; in Greenock, 328; in Dundee, 322; in Leith, 318; in Perth, 288; and in Edinburgh, 275.

Of the 36,377 births, 2029 were illegitimate, being at the rate of 5·6 per cent., or one illegitimate in every 17·9 births. The rate of illegitimacy in the Large Town districts was 4·4 per cent.; in the Small Town districts, 5·1; in the Principal Town districts, 5·5; in the Insular-Rural districts, 6·1; and in the Mainland-Rural districts, 7·2 per cent.

A comparative statement of the rate of illegitimacy in the divisions and counties of Scotland is given in Tables I. and II. Table I. shows that the highest rates occurred in the North-Eastern and Southern divisions, and Table II. that in five of the counties the rate exceeded 10 per cent. Wigtown had the highest rate of any county, viz., 13·8 per cent.; and Shetland the lowest, viz., 1·6 per cent.

Of the 36,377 births recorded, 18,429 were of males, and 17,948 of females, being in the proportion of 102·7 of the former to every 100 of the latter. During April 11,754 births were registered, being at the rate of 392 daily; during May 12,165, or 392 daily; and during June 12,458, or 415 daily.

In the Principal Town districts the deaths were equivalent to an annual rate of 176 per ten thousand inhabitants; in the Large Town districts, to a rate of

167; in the Small Town districts, 154; in the Mainland-Rural districts, 158; and in the Insular-Rural districts, 162.

In Greenock the mortality was at the annual rate of 210 in each ten thousand of the population; in Glasgow at the rate of 191; in Edinburgh, 179; in Dundee, 167; in Perth, 166; in Aberdeen and in Paisley, 158; and in Leith, 156.

Of the 19,020 deaths recorded, 9,691 were of males, and 9,329 of females. 6455 deaths were registered during April, being at the rate of 215 daily; 6301 during May, or 203 daily; and 6264 during June, or 209 daily.

MARRIAGES.

The marriages registered in Scotland during the quarter amounted to 8515, being in the proportion of 75 to every ten thousand of the estimated population, or 0·75 per cent.

The marriage rate in the Principal Town districts was 91 per ten thousand persons; in the Large Town districts, 75; in the Small Town districts, 64; in the Mainland-Rural districts, 56; and in the Insular-Rural districts, 21.

In Perth marriages occurred at the rate of 102 for each ten thousand inhabitants; in Edinburgh, at the rate of 101; in Glasgow and in Aberdeen, at the rate of 96; in Dundee, 85; in Greenock, 84; in Paisley, 78; and in Leith, 77.

During April 2477 marriages were registered, being at the rate of 83 daily; during May 1008, or 33 daily; and during June 5030, or 168 daily.

INCREASE OF POPULATION AND EMIGRATION.

The births for the quarter having amounted to 36,377, and the deaths to 19,020, the natural increase of population, not allowing for changes caused by emigration and immigration, was 17,357. No statistics are available regarding the number of immigrants, but from returns furnished by the Board of Trade it is found that the number of emigrants for the quarter was 145,226, of whom 50,003 were English, 11,317 Scottish, 19,215 Irish, 62,434 Foreign, and 2257 whose nationality was not distinguished, but of whom it may be assumed that 178 were Scottish. If then 11,317 + 178, the number of Scottish emigrants, be deducted from the number representing the excess of births over deaths, 5862 remains as the approximate increase of population for the quarter.

DISEASES IN THE ABOVE PRINCIPAL TOWNS.

About 36 per cent. of the whole population of Scotland being resident in these towns, it is believed that the mortality from various diseases observed in them will give an indication of that which prevails in the surrounding districts.

The total deaths in these towns was 2560 in April, 2497 in May, and 2601 in June. Of these 213 in April, 193 in May and 195 in June were from ill-defined and unspecified causes.

From the Acutely Infective or Specific Febrile diseases undernoted there resulted 181 deaths in April, being at the annual rate of 1·29 per thousand of the estimated population; 205 in May or 1·42 per thousand; and 179 in June, or 1·28 per thousand.

Measles caused 37 deaths in April, being at the rate of 0·26 per thousand of population; 40 in May, or 0·28 per thousand; and 36 in June, or 0·26 per thousand. Scarlet Fever accounted for 9 deaths in April, giving a rate of 0·06 per thousand of population; 17 in May, or 0·12 per thousand; and 20 in June, or 0·14 per thousand. To Hooping Cough were assigned 103 deaths in April, or 0·74 per thousand; 111 in May, or 0·77; and 99 in June, or 0·71. To Diphtheria were attributed 14 deaths in April, the rate being 0·10 per thousand; 20 in May, or 0·14; and 14 in June, or 0·10. To Fevers were due 18 deaths in April, being at the rate of 0·13 per thousand; 17 in May, or 0·12; and 10 in June, or 0·07.

Diarrhœa and Dysentery accounted for 26 deaths in April, being at the annual rate of 0·19 per thousand of population; for 29 in May, or 0·20 per thousand; and for 41 in June, or 0·29 per thousand.

From Venereal diseases there resulted 16 deaths in April, 13 in May, and 10 in June.

To Alcoholism were attributed 8 deaths in April, 11 in May, and 8 in June.

From the various forms of Malignant disease there resulted 118 deaths in April, being at the annual rate of 0·84 per thousand of population; 110 in May, or 0·76 per thousand; and 139 in June, or 0·99 per thousand.

Deaths returned as due to Pulmonary Tuberculosis and Phthisis amounted to 222 in April, showing a mortality of 1·59 in every thousand of the population; to 254 in May, or 1·76 per thousand; and to 256 in June, or 1·83 per thousand.

Developmental diseases of infancy and childhood accounted for 127 deaths in April, 118 in May, and 145 in June.

Diseases of the Nervous system caused 150 deaths in April, 144 in May, and 176 in June.

From diseases affecting the Respiratory organs there resulted 512 deaths in April, 456 in May, and 397 in June. Of these, two in April and the same number in May were due to Croup; 191 in April, 163 in May, and 158 in June were due to Bronchitis; and 269 in April, 240 in May, and 202 in June, to the various forms of Pneumonia.

To diseases of the Digestive organs were assigned 154 deaths in April, 164 in May, and 171 in June.

To diseases of the Urinary system were attributed 85 deaths in April, 62 in May and 84 in June.

Diseases of Pregnancy and Childbirth and other Puerperal conditions caused 23 deaths in April, 20 in May, and 20 in June.

The deaths from Violent causes amounted to 103 in April, 102 in May, and 109 in June.

WEATHER.

The following remarks on the weather of the quarter are extracted from the Meteorological Returns which appear in the Registrar-General's Monthly Reports :—

April was characterised by a somewhat low mean barometric pressure, with a rather low monthly range; a very low mean temperature, with a mean daily range about the average; a low mean humidity; a mean rainfall below the average, but falling on two days more than the average number; and a considerable excess of winds of about average force from North-west and North.

May was characterised by a somewhat low mean barometric pressure, with a slightly high monthly range; a mean temperature slightly below the average, with an average mean daily range; a mean humidity a little above the average; a mean rainfall slightly below the average, and falling on the average number of days; and a considerable excess of winds of moderate force from North-east and East.

June was characterised by an exceedingly high mean barometric pressure, with an extremely low monthly range; a rather low mean temperature, with a

mean daily range about equal to the average; an average mean humidity; a somewhat low mean rainfall, falling on one day less than the average number; and a remarkable excess of winds of about average force, from between North and South-east.

The mean height of the barometric column, reduced to sea-level and 32° Fahr., was 29·832 inches in April, 29·873 inches in May, and 30·096 inches in June. The mean temperature was 47°·9, being 1°·8 below the average mean temperature for the quarter during the ten previous years. The mean temperature during April was 41°·4; during May, 48°·9; and during June, 53°·5. The absolutely highest temperature was 61°·5 in April, 79°·7 in May, and 82°·0 in June; and the absolutely lowest temperature was 16°·0 in April, 20°·0 in May, and 26°·5 in June. Rain fell on 15 days in April, on 14 days in May, and on 12 days in June; the mean depth being 1·92 inch in April, 2·09 inches in May, and 2·02 inches in June. Observations of wind direction being made twice daily, winds with an easterly point were observed on 18 occasions in April, on 29 in May, and on 28 in June. Westerly winds were reported 27 times in April, 20 in May, and 19 in June. Northerly winds were recorded 27 times in April, 19 in May, and 20 in June. Southerly winds prevailed on 14 occasions in April, on 18 in May, and on 16 in June.

N.B.—Districts containing Parliamentary or Royal Burghs are printed in capitals, thus—EDINBURGH. Districts containing Police Burghs or Towns of 2000 Inhabitants and upwards are printed in small capitals, thus—CARLUKE. An asterisk "*" is prefixed to those Districts which have different names from the Parishes in which they are situated, or which comprise more, or parts of more than one Parish. The component parts of these Districts will be found on page 45. A dagger "†" is prefixed to those Districts which consist of only a part of the Civil Parish of the same name.

‡Return not received. The numbers given are those for the corresponding quarter of last year.

METEOROLOGICAL REPORT

FOR THE MONTHS OF

APRIL, MAY, JUNE,

1903.

W. & A.K. Johnston

NOTES ON THE NUMERICAL RETURNS OF SCOTTISH METEOROLOGY FOR THE QUARTER ENDING 30th JUNE 1903.

By Dr Buchan, under the Direction of the Council of the Scottish Meteorological Society.

These returns are founded on the observations made, morning and evening, at 60 of the Stations of the Scottish Meteorological Society, and have been prepared from the Observers' separate schedules.

From the individual results for each station, the following collective results have been obtained, assuming them to have been equally well observed, and to represent the whole country :—

COLLECTED RETURNS FOR ALL THE ACCEPTED STATIONS OF THE SCOTTISH METEOROLOGICAL SOCIETY, HAVING A MEAN LATITUDE = 56° 33′ N.; MEAN LONGITUDE = 3° 45′ W.; AND MEAN ELEVATION = 279 Feet.

* Returns for the individual stations having Sunshine Recorders are given on p. 62.

And when these results are compared with the averages of 1856–1900, during the same months, they show the following characteristics and differences :—

APRIL 1903—

Mean Barometric Pressure, 29·832 inches; less than the average of 1856–1900 by 0·056 inch.
Mean Temperature, 41°·4; less by 2°·6.
Mean Daily Range of Temperature, 14°·5; being the average.
Mean Humidity, 80 per cent.; less by 1·9.
Rain, Number of Days, 15; greater by 2 days.
Rain, Depth in Inches, 1·92; less by 0·30 inch.
Wind, Mean Force (on Scale of 0–12), 2·6; less by 0·1.
Wind, Direction of, a 4 days' excess of winds from N.W. and N.
Hours of Sunshine, *v.* p. 62.
Mean Amount of Cloud, 6·3; being the average.

MAY 1903—

Mean Barometric Pressure, 29·873 inches; less than the average of 1856–1900 by 0·067 inch.
Mean Temperature, 48°·9; less by 0°·1.
Mean Daily Range of Temperature 15°·3; less by 0°·2.
Mean Humidity, 79 per cent.; less by 0·8.
Rain, Number of Days, 14; greater by 1 day.
Rain, Depth in Inches, 2·09; less by 0·20 inch.
Wind, Mean Force (on Scale of 0–12), 2·3; less by 0·2.
Wind, Direction of, a 4 days' excess of winds from E. and N.E.
Hours of Sunshine, *v.* p. 62.
Mean Amount of Cloud, 6·7; greater by 0·5.

JUNE 1903—

Mean Barometric Pressure, 30·096 inches; greater than the average of 1856–1900 by 0·154 inch.
Mean Temperature, 53°·5; less by 1°·4.
Mean Daily Range of Temperature, 16°·4; greater by 0°·6.
Mean Humidity, 78 per cent.; less by 2·3.
Rain, Number of Days, 12; less by 1 day.
Rain, Depth in Inches, 2·02; less 0·56 inch.
Wind, Mean Force (on Scale of 0–12) 2·2; less by 0·2.
Wind, Direction of; a 6 days' excess of winds from N., N.E. and E.
Hours of Sunshine, *v.* p. 62.
Mean Amount of Cloud, 6·6; greater by 0·4.

APRIL 1903—

Hence the weather of APRIL 1903 was characterised by a somewhat low mean barometric pressure; a very low mean temperature, with a mean daily range equal to the average; a low mean humidity; a mean rainfall rather below the average, but falling on 2 days more than the average number; a considerable excess of winds of about average force from N.W. and N.

The mean barometric pressure was 29·832 inches, or 0·056 inch below the average. Pressure was highest about the middle of the month and lowest towards the end. The extremes at Leith being, at sea-level, 30·467 inches on the 17th and 29·345 inches on the 29th.

The mean temperature was 41°·4, or 2°·6 below the normal, the days being 2°·5 and the nights 2°·7 below their respective averages. This is the lowest temperature for April since 1891 when the mean was 41°·4, as also in 1877 and 1860, the lowest mean on record for the month being 41°·0 in 1879. The defect in temperature was everywhere well-marked and at a few places in the East and North was fully 3°·5. It was less in the West than in the East. During the first ten days of the month Westerly winds prevailed and temperature was high and rose steadily. Thereafter Northerly and then Easterly winds prevailed and were the accompaniment of a remarkable spell of cold weather lasting till nearly the end of the month with temperatures lower in some cases than any recorded since January. At very few of the reporting stations did the maximum in shade reach 60°, and frost was generally reported for a week continuously from the 12th. At Ochtertyre a minimum on grass registered frost on 20 days and on the 18th and 24th fell as low as 17°, whilst a minimum in shade gave readings below the freezing-point on every day from the 12th to 25th. At Inverness ground-frost was recorded on 21 days, at Fort-William on 16, and at Edinburgh on 17. The contrast in temperature between the week ending on the 11th and the following week was very great. Thus at Glasgow the mean temperature of the former week was 45°·6, or 2°·1 above the average, and of the latter 36°·7, or 7°·9 below. The absolute maximum was 61°·5 at Lednathie on the 9th, and the minimum 16°·0 at Stobo on the 15th.

The mean rainfall was 1·92 inches, or 14 per cent. below the average. In Shetland, Orkney, at Stornoway, in the Northern counties, in Banffshire and parts of Aberdeenshire, and at Glencarron and Glenquoich the rainfall was decidedly above the average, the excess being about 75 per cent. at Deerness, Wick and Lairg. At Fort-William and Braemar the amount was just about the average. Elsewhere there was a deficiency of varying amount, the total for the month at Arbroath, Perth, Stronvar, Dollar, Dumbarton and Stobo being less than half the average. At Fort-William no rain fell from the 13th to the 26th and at Greenock rain fell on only four days between the 7th and the 29th. Very few daily amounts exceeding an inch were reported, and the rainfall was in every way a contrast to the record of the first three months of the year. On Ben Nevis the monthly amount was 8·36 inches, or 0·31 inch above the mean of nineteen years.

Snow and hail were frequent about the middle of the month, and on the 15th a snowstorm of considerable severity was general over the country.

During the last three days of the month fog was very prevalent on East and North-East coasts. On the afternoon of the 30th a sharp thunderstorm with hail was reported at many places except in the North, and on the morning of the 18th an Aurora was noted at Glasgow.

MAY 1903—

Hence the weather of MAY 1903 was characterized by a somewhat low mean barometric pressure; a mean temperature, all but equal to the average, with a mean daily range about the average; a slightly low mean humidity; a mean rainfall a little below the average, and falling on 1 more than the average number of days; a large excess of winds of moderate force from E. and N.E.

The mean barometric pressure was 29·873 inches, or 0·067 inch below the average. Pressure was lowest at the beginning of the month and highest towards the end, the extremes at Leith being, at sea-level, 30·463 inches on the 26th and 29·281 inches on the 5th.

The mean temperature was 48°·9, or 0°·1 below the normal, the nights being of average temperature and the days 0°·2 below. The greatest deficiencies were 2°·2 at

Fort-Augustus and 1°·4 at Peterhead and Haddo House, and the greatest excesses 1°·8 at Lairg, 1°·2 at Cally and 1°·1 at Tillypronie. Nearly one half of the stations had a mean temperature within 0°·5 of the average. During the first half of the month temperature was continuously low, and on the morning of the 11th, which was in general the coldest day, frost was registered at many places, and at Glasgow and Braemar minimum thermometers exposed on grass fell to 23°·0. Very low readings were recorded also on the 19th and 20th; but thereafter temperature was almost uniformly high with maximum readings in various days during the last week of the month. The absolutely highest temperature was 79°·7 at Dumfries on the 31st, and the lowest 20°·0 at Stronvar on the 19th.

The mean rainfall was 2·09 inches, or 9 per cent. below the average. In the greater part of Aberdeenshire, in Banffshire, along the Caledonian Canal and in the South-west of Scotland there was a decided excess, amounting to 36 per cent. at Haddo House, 30 at Fort-William, 36 at Paisley and 48 at Cargen. Elsewhere there was a well-pronounced deficiency, exceeding 40 per cent. at Braemar, in Perthshire, East Lothian, Peeblesshire and Berwickshire. Rain was registered chiefly from the 1st to the 6th and from the 13th to the 17th. In the Eastern counties very little fell after the 16th, none being reported at Aberdeen after that date, though at many places there were considerable falls on the 30th. The only daily amounts exceeding an inch noted were 1·07 inch at Glencarron on the 13th and 1·20 inch at Bowhill (Dalmellington) on the 14th. On Ben Nevis the monthly amount was 6·61 inches, or 0·90 inch below the average.

Snow fell at Inverness on the 9th, at Aberdeen on the 10th, at Braemar on the 10th and 11th, and at Fort-Augustus on the 7th and 15th.

Thunder occurred in the Border counties on the 30th, and heavy fog prevailed on the Eastern and Northern coasts from the 1st to the 5th and again after the 26th.

JUNE 1903—

Hence the weather of JUNE 1903 was characterized by an extremely high mean barometric pressure; a low mean temperature, with a slightly high mean daily range; a low mean humidity; a rather low mean rainfall, falling on 1 less than the average number of days; a very large excess of winds of moderate force from a North-Easterly quarter.

The mean barometric pressure was 30·096 inches, or 0·154 inch above the average. So high a pressure for June has not been recorded since 1887, when the mean for the month was 30·174 inches. There were no great variations of pressure and Scotland was hardly affected by a series of depressions which passed across the South of England between the 9th and 19th. At Leith the barometer, at sea-level, stood below 30 inches only on the 1st, from the 15th to 19th, from 26th to 28th and on the morning of the 30th, the extremes there being 30·448 inches on the 6th, and 29·759 inches on the 18th.

The mean temperature was 53°·5, or 1°·4 below the mean, the days being 1°·1 and the nights 1°·7 below their respective averages. In Bute and Renfrewshire, and at Poltalloch and Dumbarton temperature was slightly above the average; but over the country generally there was a decided deficiency which ranged from 3°·0 at Inverness, Peterhead and Montrose, to less than 1°·0 at Bucklyvie, in the Glasgow and Edinburgh districts, and at Duns, Dumfries and Cally. A ground-frost occurred in the North and West on the 2nd, but from the 4th to the 8th high temperatures were recorded, the maximum for the month at most places being registered on the 4th. Thereafter, until the last few days of the month, when temperature was again high, persistent winds from N.E. brought very cold weather with lowest readings generally on the 20th, when the sheltered thermometer fell below 32° at several places and the exposed minimum at Braemar and Ochtertyre registered 10° of frost and at Inverness and Fort-William 8°. The mean temperature of the third week of the month was at Aberdeen 7°·0, and at Leith 6°·0, below the average of the week. The absolutely highest temperature was 82°·0 at Smeaton on the 4th, and the lowest 26°·5 at Kingussie on the 20th.

The mean rainfall was 2·02 inches, or 22 per cent. below the average. In Nairnshire and from Inverness along the Caledonian Canal as far as Invergarry there was a well-marked excess, amounting at Fort-Augustus to 28 per cent. Rainfall was also above the average in parts of the Counties of Forfar, Fife, Renfrew and Wigtown. But in general there was a decided deficiency, which exceeded 50 per cent. at Wolfelee and Poltalloch, was about 40 per cent. at Braemar and Edinburgh, and about 30 per cent. at Deerness, Dunrobin, Rothesay, Glasgow, Dumfries, Broomlands and Peterhead. The greater part of the rain fell during the last few days of the month, and at many places, there were only one or two rainy days during the first three weeks. The heaviest daily amounts were 1·42 inch at Fort-William on the 30th, and 1·40 inch at Kilmarnock on the 27th. On Ben Nevis the monthly amount was 6·44 inches, or 1·10 inch below the average.

Thunderstorms occurred at many places on the 24th, 25th and 29th, and were of great severity in Central Perthshire.

At Inverness on the 13th there were showers of hail and sleet.

REGISTRARS' NOTES.

In compliance with the following Instructions, many of the Registrars have appended remarks to their Returns, from which the subjoined Notes have been selected. The Registrars alone must be considered responsible for the opinions which they express.

INSTRUCTIONS TO REGISTRARS.

"If, at any time, the Births (whether legitimate or illegitimate), the Deaths, or the Marriages registered during the Quarter have been above or below the average, here state what you consider to be the cause, and whether epidemics, such as Measles, Typhus, Cholera, etc., have prevailed in the District; or if there is any other fact in the character of the Weather, Sanitary or Social Arrangements, Movement of the Population, etc., which will account for the circumstance."

The Figures refer to the Numbers of the Districts in the preceding Tables.

* The actual number of Districts is 1073—many Parishes and Burghs having been divided into two or more Districts for the purpose of Registration. Thus Edinburgh and Glasgow, to each of which only a single number is assigned in the Tables, consist of 6 and 14 Districts respectively. In forming the alphabetical arrangement the principle adopted has been to place *compound* names in the order in which they are pronounced.

REPORT.

During the quarter ending 30th September 1903, there were registered in Scotland 32,928 births, 16,609 deaths, and 8235 marriages. Taking as a standard of comparison the mean of the numbers registered in the corresponding quarter of the last ten years, it is found that the births and deaths are below, and the marriages slightly above the decennial average.

BIRTHS.

The 32,928 births recorded during the quarter represent an annual rate of 285 per ten thousand of the estimated population, or 2·85 per cent.

In the Principal Town districts the birth-rate was 295 for each ten thousand inhabitants; in the Large Town districts, 304; in the Small Town districts, 287; in the Mainland-Rural districts, 255; and in the Insular-Rural districts, 234.

Wt. 28/2098

In Glasgow the birth-rate was 310 per ten thousand of population; in Aberdeen, 300; in Paisley, 288; in Greenock, 284; in Leith, 277; in Dundee, 274; in Edinburgh, 245; and in Perth, 241.

Of the 32,928 births, 2140 were illegitimate, being at the rate of 6·5 per cent., or one illegitimate in every 15·4 births. The rate of illegitimacy in the Large Town districts was 4·5 per cent.; in the Insular-Rural districts, 5·0; in the Small Town districts, 5·9; in the Principal Town districts, 6·4; and in the Mainland-Rural districts, 9·3 per cent.

A comparative statement of the rate of illegitimacy in the divisions and counties of Scotland appears in Tables I. and II. Table I. shows that the highest rates occurred in the North-Eastern and Southern divisions, and Table II. that in ten of the counties the rate was over 10 per cent. The lowest rate in any county occurred in Shetland, viz., 1·3 per cent.; and the highest in Kinross, viz., 13·9 per cent.

Of the 32,928 births recorded, 16,742 were of males, and 16,186 of females, being in the proportion of 103·4 of the former to every 100 of the latter. During July, 11,656 births were recorded, being at the rate of 376 daily; during August, 10,741, or 346 daily; and during September, 10,531, or 351 daily.

The mortality in the Principal Town districts was at the annual rate of 153 per ten thousand persons; in the Large Town districts, at the rate of 144; in the

Small Town districts, 136; in the Mainland-Rural districts, 131; and in the Insular-Rural districts, 157.

In Paisley the death rate was 181 per ten thousand inhabitants; in Greenock, 163; in Glasgow, 161; in Dundee, 154; in Aberdeen, 149; in Edinburgh, 145; in Perth, 144; and in Leith, 142.

Of the 16,609 deaths registered, 8386 were of males, and 8223 of females. 5701 were registered during July, being at the rate of 184 daily; 5451 during August, or 176 daily; and 5457 during September, or 182 daily.

MARRIAGES.

The marriages registered in Scotland during the quarter amounted to 8235, being at the rate of 72 in every ten thousand of the estimated population, or 0·72 per cent.

In the Principal Town districts the marriages were in the proportion of 92 to every ten thousand inhabitants; in the Large Town districts, in the proportion of 78; in the Small Town districts, 58; in the Mainland-Rural districts, 40; and in the Insular-Rural districts, 19.

In Edinburgh, the marriage rate was 105 per ten thousand of population; in Glasgow, 100; in Perth, 96; in Aberdeen, 95; in Paisley and in Greenock, 89; in Dundee, 84; and in Leith, 79.

Of the 8235 marriages, 3897 were registered during July, being at the rate of 126 daily; 2116 during August, or 68 daily; and 2222 during September, or 74 daily.

INCREASE OF POPULATION AND EMIGRATION.

The births for the quarter amounted as before-mentioned to 32,928, and the deaths to 16,609, so that the natural increase of population, leaving out of account the changes caused by emigration and immigration, was 16,319. No estimate can be formed as to the number of immigrants, but with regard to emigrants, it is found from returns furnished by the Board of Trade that the number of these for the quarter was 140,456, of whom 59,265 were English, 12,664 Scottish, 14,465 Irish, 51,962 Foreign, and 2100 whose nationality was not distinguished, but of whom it may be assumed that 192 were Scottish. There falls to be deducted therefore from the excess of births over deaths, a loss by emigration of 12,856, which leaves 3463 as the approximate increase of population for the quarter.

DISEASES IN THE ABOVE PRINCIPAL TOWNS.

As these towns contain about 36 per cent. of the whole population of Scotland, the mortality from various diseases observed in them may be taken as an indication of that which prevails throughout the country.

The total deaths in these towns amounted to 2262 in July, to 2170 in August, and to 2262 in September. Of these, 169 in July, an equal number in August, and 177 in September, were from ill-defined and not specified causes.

From the Acutely Infective or Specific Febrile diseases aftermentioned, there resulted 168 deaths in July, being at the annual rate of 1·16 per thousand of the estimated population; 129 in August, or 0·89 per thousand; and 122 in September, or 0·87 per thousand.

One death from Small-pox resulted in Edinburgh in July, and 2 in Greenock in August. Measles caused 40 deaths in July, being at the rate of 0·28 per thousand of population; and 24 in August, and the same number in September, giving a rate for each of these two months of 0·17 per thousand. Scarlet Fever accounted for 18 deaths in each of the months of July and August, being at the rate of 0·12 per thousand; and for 11 deaths in September, or 0·08 per thousand. To Hooping-Cough were attributed 66 deaths in July, or 0·46 per thousand; 41 in August, or 0·28 per thousand; and 38 in September, or 0·27 per thousand. Diphtheria caused 15 deaths in July, or 0·10 per thousand of population; 16 in August, or 0·11; and 22 in September, or 0·16. To Fevers were ascribed 28 deaths in July, 28 in August, and 27 in September, the rate for each month being 0·19 per thousand.

Diarrhœa and Dysentery accounted for 62 deaths in July, being at the annual rate of 0·43 per thousand of population; for 112 in August, or 0·77 per thousand; and for 97 in September, or 0·69 per thousand.

To Venereal diseases were ascribed 15 deaths in July, 13 in August, and 14 in September.

To Alcoholism were attributed 8 deaths in July, and 7 in each month in August and September.

The deaths from Carcinoma, Sarcoma, and Cancer amounted to 129 in July, being at the annual rate of 0·89 per thousand of population; to 110 in August, or 0·76 per thousand; and to 116 in September, 0·83 per thousand.

In July the deaths of 194 persons were attributed to Pulmonary Tuberculosis and Phthisis, being equal to an annual mortality rate of 1·34 per thousand of the population; in August 193, or 1·33 per thousand; and in September 202, or 1·44 per thousand.

Developmental diseases of infancy and childhood accounted for 93 deaths in July, 123 in August, and 105 in September.

To diseases of the Nervous system were assigned 149 deaths in July, 152 in August, and 136 in September.

Diseases of the Respiratory organs caused 362 deaths in July, 232 in August, and 294 in September. Of these, 3 in September were attributed to Croup; 130 in July, 93 in August, and 118 in September to Bronchitis; and 190 in July, 113 in August, and 132 in September to Pneumonia.

From diseases of the Digestive system there resulted 180 deaths in July, 225 in August, and 229 in September.

To diseases of the Urinary system were attributed 54 deaths in July, 65 in August, and 61 in September.

Diseases of Pregnancy and Childbirth (including those due to septic infection) caused 19 deaths in July, 26 in August, and 21 in September.

From Violent causes there resulted 116 deaths in July, 100 in August, and 110 in September.

WEATHER.

The following remarks on the weather of the quarter are extracted from the Meteorological Returns which appear in the Registrar-General's Monthly Reports :—

July was characterised by a rather low mean barometric pressure, with a very low monthly range; a rather low mean temperature, with a slightly low mean daily range; a mean humidity a little above the average; a high mean rainfall falling on three days more than the average number; and a great excess of winds of rather more than average force from between North and South-east.

August was characterised by an extremely low mean barometric pressure, with a high monthly range; a low mean temperature, with an average mean daily range; an average mean humidity; a very high mean rainfall, falling on six days more than the average number; and a large excess of winds of considerably more than average force from a Westerly quarter.

September was characterised by a rather high mean barometric pressure, with a slightly low monthly range; a slightly low mean temperature, with an average mean daily range; a mean humidity, fractionally above the average; a slightly low mean rainfall, falling on one day more than the average number; and a very large excess of winds of average force, from a South-easterly quarter.

The mean height of the barometric column, reduced to sea-level and 32° Fahr., was 29·846 inches in July, 29·678 inches in August, and 29·956 inches in September. The mean temperature was 54°·2, being 1°·8 below the average mean temperature for the quarter during the ten years immediately preceding. The mean temperature of July was 55°·6; of August, 54°·4; and of September, 52°·5. The absolutely highest temperature was 80°·0 in July, 74°·0 in August, and 72°·0 in September; and the absolutely lowest was 33°·0 in July, 32°·5 in August, and 27°·0 in September. Rain fell on 17 days in July, on 22 days in August, and on 16 days in September; the mean depth being 4·50 inches in July, 5·53 inches in August, and 3·20 inches in September. With observations of wind direction made twice daily, winds with an easterly point were reported 20 times in July, 10 times in August, and 23 times in September. Westerly winds were noted on 29 occasions in July, on 41 in August, and on 21 in September. Northerly winds were observed on 20 occasions in July, on 13 in August, and on 12 in September. Southerly winds prevailed at 19 observations in July, at 23 in August, and at 27 in September.

N.B.—Districts containing Parliamentary or Royal Burghs are printed in capitals, thus—EDINBURGH. Districts containing Police Burghs or Towns of 2000 Inhabitants and upwards are printed in small capitals, thus—CARLUKE. An asterisk "*" is prefixed to those Districts which have different names from the Parishes in which they are situated, or which comprise more, or parts of more than one Parish. The component parts of these Districts will be found on page 45.
A dagger "†" is prefixed to those Districts which consist of only a part of the Civil Parish of the same name.

SCOTTISH METEOROLOGICAL SOCIETY.
Reported to the Registrar General of Scotland.

NOTES ON THE NUMERICAL RETURNS OF SCOTTISH METEOROLOGY FOR THE QUARTER ENDING 30th SEPTEMBER 1903.

By Dr BUCHAN, under the Direction of the Council of the Scottish Meteorological Society.

THESE returns are founded on the observations made, morning and evening, at 60 of the Stations of the Scottish Meteorological Society, and have been prepared from the Observers' separate schedules.

From the individual results for each station, the following collective results have been obtained, assuming them to have been equally well observed, and to represent the whole country :—

COLLECTED RETURNS FOR ALL THE ACCEPTED STATIONS OF THE SCOTTISH METEOROLOGICAL SOCIETY, HAVING A MEAN LATITUDE = 56° 33′ N.; MEAN LONGITUDE = 3° 45′ W.; AND MEAN ELEVATION =279 Feet.

* Returns for the individual stations having Sunshine Recorders are given on p. 62.

And when these results are compared with the averages of 1856–1900, during the same months, they show the following characteristics and differences :—

JULY 1903—

Mean Barometric Pressure, 29·846 inches; less than the average of 1856–1900 by 0·040 inch.
Mean Temperature, 55°·6 ; less by 1°·6.
Mean Daily Range of Temperature, 14°·7 ; less by 0°·2.
Mean Humidity, 82 per cent. ; being the average.
Rain, Number of Days, 17 ; greater by 2 days.
Rain, Depth in Inches, 4·50 ; greater by 1·35 inch.
Wind, Mean Force (on Scale of 0–12), 2·4 ; being the average.
Wind, Direction of, a 4 days' excess of winds from between N. and S.E.
Hours of Sunshine, *v.* p. 62.
Mean Amount of Cloud, 7·2 ; greater by 0·6.

AUGUST 1903—

Mean Barometric Pressure, 29·678 inches ; less than the average of 1856–1900 by 0·180 inch.
Mean Temperature, 54°·4; less by 2°·2.
Mean Daily Range of Temperature 14°·7 ; greater by 0°·2.
Mean Humidity, 81 per cent.; less by 2·7.
Rain, Number of Days, 22 ; greater by 6 days.
Rain, Depth in Inches, 5·53 ; greater by 1·91 inch.
Wind, Mean Force (on Scale of 0–12), 2·4 ; greater by 0·1.
Wind, Direction of, a 6 days' excess of winds from between S.W. and N.W.
Hours of Sunshine, *v.* p. 62.
Mean Amount of Cloud, 6·5 ; being the average.

SEPTEMBER 1903—

Mean Barometric Pressure, 29·956 inches; greater than the average of 1856–1900 by 0·113 inch.
Mean Temperature, 52°·5; less by 0°·3.
Mean Daily Range of Temperature, 14°·3; greater by 0°·3.
Mean Humidity, 84 per cent.; less by 1·5.
Rain, Number of Days, 16; being the average.
Rain, Depth in Inches, 3·20; less by 0·40 inch.
Wind, Mean Force (on Scale of 0–12) 2·3; less by 0·3.
Wind, Direction of; a 6 days' excess of winds from between E. and S.
Hours of Sunshine, *v.* p. 62.
Mean Amount of Cloud, 6·1; less by 0·2.

JULY 1903—

Hence the weather of JULY 1903 was characterised by a rather low mean barometric pressure; a low mean temperature, with a mean daily range about equal to the average; an average mean humidity; a very high mean rainfall, falling on 2 more than the average number of days; a considerable excess of winds of average force from between N. and S.E.

The mean barometric pressure was 29·846 inches, or 0·040 inch below the average. Pressure was irregular during the first six days of the month, and on the 5th a fall amounting at most places to half-an-inch was accompanied by somewhat stormy weather. Thereafter there were no very great barometric fluctuations. The extremes at Leith were, at sea-level, 30·225 inches on the 9th and 29·454 inches on the 5th.

The mean temperature was 55°·6, or 1°·6 below the mean, the days being 1°·7 and the nights 1°·5 below their respective averages. In Midlothian temperature was just about the average, but in general there was a well-marked deficiency, which ranged from about 0°·5 in the extreme South to fully 3°·0 at Peterhead, Nairn, and Wick. The month commenced with temperatures considerably above the average, followed by a short cold period, with fairly high temperatures again from the 9th to 11th. From the 14th to 21st cold Easterly winds prevailed and low temperatures were recorded, as again from the 27th to 29th. At most places highest temperatures were recorded on the 2nd, 9th, 10th or 25th, and lowest on 7th, 8th or 14th. At only about one third of the stations was a maximum of 75°·0 or over reported during the month. At Aberdeen temperature failed to reach 60°·0 from the 13th to the 19th, and on the 16th rose to only 52°·7, the mean temperature there for the week ending July 18th being 51°·5 as compared with 59°·2 for the week ending July 4th, the corresponding figures for Leith being 54°·1 and 61°·2, and for Glasgow 54°·0 and 58°·6. At Fort-William, on the night of the 13th, a thermometer exposed on grass fell to 31°·1. The absolute maximum was 80°·0 at Dumfries on the 2nd and Balruddery on the 10th, and the minimum 33°·0 at Wolflee on the 8th.

The mean rainfall was 4·50 inches, or 43 per cent. above the average, being the largest rainfall for July since 1888, when the mean was 4·69 inches. Except over a limited area in the Glasgow district, where about the normal amount was recorded, there was everywhere a decided excess which was most pronounced towards the North-Eastern counties. At Haddo House more than twice the average amount fell, whilst there was an excess of 93 per cent. at Gordon Castle, and of about 80 per cent. at Wick, Aberdeen, Montrose, and Lednathie. At Cally, on the other hand, the excess amounted to only 12 per cent. and at Fort William to only 18 per cent. At the beginning of the month heavy falls took place, except in the South-Eastern counties, and, especially in N. and N.W., some heavy daily amounts were reported. On the 5th, 2·50 inches were registered at Wick, whilst the total for the first five days of the month was 4·17 inches at Glencarron and 3·63 inches at Fort-William. About the middle of the month heavy falls took place in the East and South At Dumfries 1·33 inch fell on the 14th, and at Dundee 1·63 inch on the 16th. A good deal of rain fell towards the end of the month, Montrose reporting 1·16 inch on the 26th. On Ben Nevis the monthly amount was 13·26 inches, or 2·47 inches above the mean.

Thunder was reported at many places on the 2nd and towards the end of the month. On the 5th and 6th very strong winds from N. and N.W. prevailed, reaching gale force in several districts. Fog was prevalent on North and West coasts from 8th to 10th, on the South East on 16th and 17th, and in the East and North towards the end of the month.

AUGUST 1903—

Hence the weather of AUGUST 1903 was characterised by an extremely low mean barometric pressure; a low mean temperature, with a mean daily range about the average; a rather low mean humidity; a very high mean rainfall, falling on 6 days more than the average number; a large excess of winds of about average force from a Westerly quarter.

The mean barometric pressure was 29·678 inches, or 0·180 inch below the average. Lowest readings were everywhere noted on the morning of the 15th, when a severe thunderstorm occurred at many places, and on the 30th a fall at most places of fully half-an-inch was accompanied by stormy weather. The extremes at Leith were, at sea-level, 30·071 inches on the 25th and 28·882 inches on the 15th.

The mean temperature was 54°·4, or 2°·2 below the normal, the days being 2°·1 and the nights 2°·3 below their respective averages. The mean was 0°·5 above the corresponding mean for 1902, but with that exception the month was colder than any August since 1885 when the mean was 53°·6. Temperature was everywhere deficient, by less than 1°·0 in the Edinburgh district, by less than 2°·0 towards the South-West of the country, by larger amounts towards the North, and by as much as 3°·5 at Fort-Augustus. There was a notable absence of high temperatures, only about one-fifth of the stations reporting a maximum of 70°·0 or over. Temperature differed little from the average at the beginning of the month, but thereafter at most places remained almost continuously below the mean, the coldest week being that ending on the 22nd, the mean temperature of which showed at Aberdeen and Fort-William a defect of 3°·7, and at Ochtertyre of 5°·5. The absolutely highest temperature was 74°·0 at Clathick on the 1st, and the lowest 32°·5 at Lednathie on the 25th.

The mean rainfall was 5·53 inches, or 53 per cent. above the average, the month being the wettest August since 1877, when the mean was 6·35 inches. At Inverness and in Nairnshire rainfall was just about the average, but over the country generally there was a decided excess which was relatively greater in Western districts than in Eastern, and least in Roxburghshire and on the South Coast. At Lairg and Paisley the monthly amount was more than two and a half times, and at Fort-William and Rothesay more than twice the average. At about half of the stations the amounts were at least 50 per cent. above the average, and at Lednathie, Stronvar, Greenock, and Drumlanrig there was an excess of fully 80 per cent. In the Edinburgh district there was an excess of 25 per cent., on the Borders of about 15, and at Dumfries and Cally of less than 10. The largest daily amounts reported were 2·05 inches at Lednathie on the 31st, and 1·57 inch at Fort-William on the 26th. At Stronvar there was only one rainless day, and at Glencarron only two, whilst towards the South-East rain fell less frequently. The period from the 15th to 25th was the least rainy time of the month. On Ben Nevis the monthly amount was 20·97 inches, or 7·62 inches above the mean.

Thunder was unusually frequent during the month, most of the occurrences being between the 11th and 23rd. It was reported at least once in most districts and at Gordon Castle on no fewer than 9 days.

The weather of the month was in general very unsettled, especially on the West Coast, and on the 26th and 30th gales were generally reported.

SEPTEMBER 1903—

Hence the weather of SEPTEMBER 1903 was characterised by a rather high mean barometric pressure ; a mean temperature slightly below the average, with a mean daily range slightly above ; a slightly low mean humidity ; a slightly low mean rainfall, falling on the average number of days ; a very large excess of winds of rather less than average force from a South-Easterly quarter.

The mean barometric pressure was 29·956 inches, or 0·113 inch above the average. Lowest readings were everywhere recorded on the 10th, and highest on the 14th or 15th, the extremes at Leith, at sea-level, being 29·326 inches on the 10th, and 30·550 inches on the 14th.

The mean temperature was 52°·5, or 0°·3 below the normal, the days and nights being both below their respective averages by that amount. Few of the stations differed from their average by as much as 1°·0. In the Edinburgh district there was a slight excess, but elsewhere in Eastern counties a deficiency, whilst towards the N.W. of the country temperature was in general above the average. The month opened with fairly high temperatures, but thereafter a spell of cold weather set in with winds from E. and S.E. and with lowest temperatures generally on the 15th, on which day the thermometer fell below 32°·0 at about one third of the stations, ground-frost occurring for two or three days in succession in many districts. During the last ten days of the month temperature was again high, with highest readings for the month at most places between the 23rd and 26th. The absolutely highest temperature was 72°·0 at Fort-William on the 20th, and the lowest 27°·0 at Braemar and Crathes on the 15th.

The mean rainfall was 3·20 inches, or 11 per cent. below the average. At Wolflee there was an excess of 31 per cent., and at Aberdeen, Paisley, and one or two other places, the amounts were fractionally above the average. But in general there was a deficiency, slight in Southern and Eastern districts, but becoming more pronounced towards the North and West. Thus Berwickshire and Midlothian had rainfalls within 10 per cent. of the average, whilst Gordon Castle, Nairnshire, and Glencarron had an excess of nearly 40 per cent., and Braemar, Kingussie, Fort-Augustus, Inverness, and Stornoway of between 20 and 30 per cent. Most of the rain was registered during the first ten days of the month, and at stations in E. and S.E. heavy falls occurred on the 2nd, Wolflee reporting 1·85 inch on that day. From the 13th to 21st hardly any rain fell in any district, and at several Northern stations but little thereafter ; but at most places towards the end of the month the weather again became wet and unsettled. On Ben Nevis the monthly amount was 10·72 inches, or 4·23 inches below the mean.

Thunder was reported in Midlothian and the Border counties on the 11th, and in Central Perthshire on the 30th. An Aurora was observed at Fort-William on the night of the 19th.

Dense fogs occurred on the East Coast from the 23rd to 27th, and in the North from the 23rd to 30th.

REGISTRARS' NOTES.

In compliance with the following Instructions, many of the Registrars have appended remarks to their Returns, from which the subjoined Notes have been selected. The Registrars alone must be considered responsible for the opinions which they express.

INSTRUCTIONS TO REGISTRARS.

"If, at any time, the Births (whether legitimate or illegitimate), the Deaths, or the Marriages registered during the Quarter have been above or below the average, here state what you consider to be the cause, and whether epidemics, such as Measles, Typhus, Cholera, etc., have prevailed in the District; or if there is any other fact in the character of the Weather, Sanitary or Social Arrangements, Movement of the Population, etc., which will account for the circumstance."

The Figures refer to the Numbers of the Districts in the preceding Tables.

I. NORTHERN DIVISION.

2. Orkney.

26. Sanday.—Deaths above the average. The infantile mortality was great, and Influenza prevalent. August was a very wet month.

31. Stronsay.—The deaths include those of two brothers drowned while fishing.

4. Sutherland.

45. Clyne.—One death, of a boy aged 3 years, from accidental drowning.

46 (1). BONAR.—The proportion of illegitimate births is increased by those occurring in the County Combination Poorhouse.

II. NORTH-WESTERN DIVISION.

5. ROSS AND CROMARTY.

Insular.

86*b*. CARLOWAY.—Measles very prevalent during September.

6. INVERNESS.

Mainland.

90*b*. ALVIE.—Two of the four deaths were caused by drowning.

94. CROY AND DALCROSS.—One of the two deaths resulted from violence.

96*a*. DORES.—The death registered in September was that of a man almost 100 years of age, who never required medical attendance.

100. KILMORACK. — Of the nine deaths recorded, two resulted from an accident to a traction engine.

102. KINGUSSIE AND INSH.—Of the fifteen deaths registered, four were those of summer visitors, one was that of a woman accidentally drowned, and one of a person aged 102 years. Several deaths resulted from Hooping-cough.

104. LAGGAN.—The only death was that of a female aged 90 years.

Insular.

109 (2). MINGINISH.—One of the two deaths was that of a tourist killed by falling over a precipice.

111 (1). NORTH HARRIS. —Typhoid fever is reported to have appeared in the village of Tarbert.

111 (3). BERNERA.—The two deaths were those of infants aged respectively 9 hours and 3 days.

113. NORTH UIST.—Hooping-cough has been in the parish for the last three months.

III. NORTH-EASTERN DIVISION.

8. ELGIN.

130. DRAINIE.—Two deaths were caused by drowning, one accidental and the other suicidal.

10. ABERDEEN.

172. AUCHINDOIR.—Three of the six deaths are of females aged 82, 85, and 89 years.

173. AUCHTERLESS.- One case of Small-pox occurred. Precautions were successfully taken to prevent the disease from spreading.

183 (1). BRAEMAR.—Two of the four deaths were those of persons non-resident in the district, one of whom was killed by a bicycle accident.

185. CRUDEN.—Two of the deaths recorded were due to accidental drowning.

225. NEW DEER.—Six of the fourteen deaths occurred in the Buchan Combination Poorhouse. Eight of the persons who died were aged over 70 years, the oldest being 86.

241. STRICHEN.—Only one marriage registered, but several persons resident in the district were married elsewhere.

11. KINCARDINE.

254. BERVIE. — Hooping-cough prevalent. Two deaths therefrom.

IV. EAST-MIDLAND DIVISION.

12. FORFAR.

271. ARBIRLOT. — One of the two deaths resulted from Suicide.

307 (1). MAINS (LANDWARD).—One death from Small-pox.

13. PERTH.

325. ABERFOYLE.—The death registered in July was that of a visitor accidentally drowned while bathing.

326. ABERNETHY.—Three of the four deaths were of persons aged respectively 74, 84, and 85 years.

331. BALQUHIDDER.—Death-rate above the average. Four of the six deaths were of persons whose average age was 70 years.

387. PERTH (LANDWARD). — The deaths registered are those of patients (belonging to Perth) in the Fever Hospital of the Corporation.

395. TIBBERMORE.—Parish contains the County Hospital and nearly 2000 inhabitants, but no deaths have occurred for over three months.

14. FIFE.

408. BALLINGRY.—About 150 cases of Typhoid fever have occurred in the village of Lochore and vicinity since the outbreak of the epidemic. Six deaths from this cause were registered in the parish, and several others took place at various hospitals situated in other districts.

420. CUPAR.—Of the deaths registered, fourteen occurred in the Fife and Kinross Asylum.

440. KINGLASSIE. — Three of the four deaths took place in the Fever Hospital.

458*b*. TULLIALLAN.—Of the four deaths registered, one resulted from accidental drowning.

15. KINROSS.

461. FOSSOWAY AND TULLIEBOLE.—The number of illegitimate births is exceptional, but in each case the mother had just come into the parish from another district.

463. ORWELL.—Of the eleven deaths recorded, two occurred in the County Hospital, and two in the Ochil Hills Sanatorium.

V. WEST-MIDLAND DIVISION.

17. STIRLING.

484. KIPPEN.—Of the three deaths registered, one was caused by an accident, and the other two were of persons aged respectively 79 and 87.

19. ARGYLL.

Insular.

542. KILFINICHEN AND KILVICKEON.—Births, deaths, and marriages below the average. Population of parish steadily decreasing.

VI. SOUTH-WESTERN DIVISION.

21. RENFREW.

566. INCHINNAN.—Two of the three deaths were caused by drowning.

571 (1). BUSBY.—Population decreasing owing to the cessation of the Calico printworks.

22. AYR.

577 (1). AUCHINLECK.—Deaths above the average. Hooping-cough prevalent. Six of the twenty-one deaths were of persons belonging to other districts.

VII. SOUTH-EASTERN DIVISION.

25. EDINBURGH.

677. COLINTON.—Of the six illegitimate births, four took place in Craiglockhart Poorhouse, and in the two other cases the domicile of the mother was not in Colinton parish.

27. BERWICK.

* The actual number of Districts is 1073—many Parishes and Burghs having been divided into two or more Districts for the purpose of Registration. Thus Edinburgh and Glasgow, to each of which only a single number is assigned in the Tables, consist of 6 and 14 Districts respectively. In forming the alphabetical arrangement the principle adopted has been to place *compound* names in the order in which they are pronounced.

REPORT.

During the quarter ending 31st December 1903, there were registered in Scotland 32,085 births, 19,413 deaths, and 7843 marriages. On comparing these figures with the mean of the numbers of the corresponding quarter for the last ten years, it appears that in all three cases the numbers are below the average.

BIRTHS.

The number of births recorded during the quarter was 32,085, being at the annual rate of 278 per ten thousand of the estimated population, or 2·78 per cent.

In the Principal Town districts the birth-rate was 290 per ten thousand inhabitants; in the Large Town districts, 300; in the Small Town districts, 279; in the Mainland-Rural districts, 244; and in the Insular-Rural districts, 219.

Wt. 28/2098

In eight of the principal towns the birth-rates per ten thousand of estimated population were as follows:—Aberdeen, 309; Glasgow, 306; Leith, 298; Greenock, 281; Dundee, 274; Paisley, 272; Perth, 230; and Edinburgh, 227.

Of the 32,085 births, 1978 were illegitimate, being at the rate of 6·2 per cent., or one illegitimate in every 16·2 births. The rate of illegitimacy was 4·3 in the Insular-Rural districts; 4·7 in the Large Town districts; 6·0 in the Principal and in the Small Town districts; and 8·1 in the Mainland-Rural districts.

A comparative statement of the rate of illegitimacy in the divisions and counties of Scotland appears in Tables I. and II. Table I. shows that the highest rate occurred in the North-Eastern division, and Table II. shows that in seven counties the rate exceeded 10 per cent. In Kinross no illegitimate births were recorded, but in Elgin they were equal to 12·5 per cent. of the total births.

Of the 32,085 births recorded, 16,352 were of males, and 15,733 of females, being in the proportion of 103·9 of the former to every 100 of the latter. During October, 11,002 births were registered, being at the rate of 355 daily; during November, 9924, or 331 daily; and during December, 11,159, or 360 daily.

The mortality in the Principal Town districts was at the annual rate of 180 per ten thousand persons; in the Large Town districts, 172; in the Small Town

districts, 163; in the Mainland-Rural districts, 146; and in the Insular-Rural districts, 154.

In Glasgow the death-rate per ten thousand was 201; in Dundee, 193; in Greenock, 184; in Perth, 182; in Paisley, 170; in Edinburgh, 169; in Aberdeen, 163; and in Leith, 150.

Of the 19,413 deaths recorded, 9651 were of males, and 9762 of females. 5879 were recorded in October, being at the rate of 190 daily; 6049 in November, or 202 daily; and 7485 in December, or 241 daily.

MARRIAGES.

The marriages registered during the quarter numbered 7843, being at the rate of 68 per ten thousand of the estimated population, or 0·68 per cent.

In the Principal Town districts the rate per ten thousand was 79; in the Large Town districts, 63; in the Small Town districts, 61; in the Mainland-Rural districts, 56; and in the Insular-Rural districts, 40.

In eight of the principal towns the rates per ten thousand were as follows:—Edinburgh, 94; Aberdeen, 92; Glasgow, 83; Dundee, 82; Greenock, 80; Perth, 73; Leith, 63; and Paisley, 56.

Of the 7843 marriages, 1986 were registered during October, or 64 daily; 2262 during November, or 75 daily; and 3595 during December, or 116 daily.

INCREASE OF POPULATION AND EMIGRATION.

As mentioned above, the births during the quarter amounted to 32,085, and the deaths to 19,413, so that the natural increase of population, neglecting the changes caused by emigration and immigration, was 12,672. No estimate can be formed as to the number of immigrants, but with regard to emigrants, it is found from returns furnished by the Board of Trade that the number of these for the quarter was 84,360, of whom 35,761 were English, 7431 Scottish, 7712 Irish, 31,133 Foreign, and 2323 whose nationality was not distinguished, but of whom it may be assumed that 210 were Scottish. There falls to be deducted, therefore, from the excess of births over deaths, a loss by emigration of 7641, which leaves 5031 as the approximate increase of population for the quarter.

DISEASES IN THE ABOVE PRINCIPAL TOWNS.

As these towns contain about 36 per cent. of the whole population of Scotland, the mortality from various diseases observed in them may be taken as an indication of that which prevails throughout the country.

The total deaths in these towns numbered 2385 in October, 2479 in November, and 3098 in December. Of these, 187 in October, 204 in November, and 227 in December, were from ill-defined and not specified causes.

From the Acutely Infective or Specific Febrile diseases aftermentioned, there resulted 141 deaths in October, being at the annual rate of 0·97 per thousand of the estimated population; 159 in November, or 1·14 per thousand; and 241 in December, or 1·67 per thousand.

From Small-pox there resulted 1 death in October, 10 in November, and 12 in December, all of which occurred in Glasgow. Measles caused 51 deaths in October, giving an annual mortality rate of 0·35 per thousand; 62 in November, rate 0·44 per thousand; and 133 in December, or 0·92 per thousand. To Scarlet Fever 17 deaths were attributed in October, giving a rate of 0·12 per thousand; 11 in November, or 0·08 per thousand; and 15 in December, or 0·11 per thousand inhabitants. Hooping Cough accounted for 29 deaths in October, at the rate of 0·20 per thousand; 30 deaths in November, or 0·21 per thousand; and 54 in December, or 0·37 per thousand. To Diphtheria there were ascribed 16 deaths in October, or 0·11 per thousand; 23 in November, or 0·17 per thousand; and 14 in December, or 0·10 per thousand. Fevers were the cause of 27 deaths in October, being at the rate of 0·18 per thousand; 23 in November, or 0·17 per thousand; and 13 in December, or 0·09 per thousand.

Diarrhœa and Dysentery accounted for 76 deaths in October, a rate of 0·53 per thousand; 33 in November, a rate of 0·24 per thousand; and 29 in December, or 0·20 per thousand.

To Venereal diseases were ascribed 9 deaths in October, 13 in November, and 9 in December.

Alcoholism caused 10 deaths in October, 6 in November, and 8 in December.

Carcinoma, Sarcoma, and Cancer accounted for 135 deaths in October, representing an annual rate of 0·93 per thousand inhabitants; 113 in November, at the rate of 0·81 per thousand; and 128 in December, or 0·89 per thousand.

The deaths from Pulmonary Tuberculosis and Phthisis amounted to 218 in October, and 212 in November, representing in each case an annual rate of 1·51 per thousand; and 245 in December, or 1·59 per thousand.

Developmental diseases of infancy and childhood caused 117 deaths in October, 95 in November, and 128 in December.

Diseases of the Nervous system accounted for 144 deaths in October, 141 in November, and 171 in December.

From diseases of the Respiratory system there resulted 380 deaths in October, 567 in November, and 770 in December. Of these, 3 in October and 2 in November were attributed to Croup; 145 in October, 238 in November, and 342 in December to Bronchitis; and 186 in October, 280 in November, and 358 in December to Pneumonia.

Diseases of the Digestive system caused 215 deaths in October, 156 in November, and 178 in December.

Diseases of the Urinary system accounted for 60 deaths in October, 78 in November, and 111 in December.

The deaths from diseases of Pregnancy and Childbirth (including those due to septic infection) numbered 25 in October, 19 in November, and 23 in December.

Violent causes accounted for 77 deaths in October, 103 in November, and 107 in December.

WEATHER.

The following remarks on the weather of the quarter are extracted from the Meteorological Returns which appear in the Registrar-General's Monthly Reports :—

October was characterised by an abnormally low mean barometric pressure, with a rather low monthly range; a slightly high mean temperature, with a slightly low mean daily range; a mean humidity about the average; an abnormally high mean rainfall falling on 10 days more than the average number; a very large excess of winds of average force from a Southerly quarter.

November was characterised by a somewhat high mean barometric pressure, with a rather low monthly range; a slightly high mean temperature, with a slightly high mean daily range; a mean humidity about the average; a mean rainfall considerably below the average, but falling on two days more than the average number; a large excess of winds of about average force from West and North-west.

December was characterised by a low mean barometric pressure, with a slightly low monthly range; a low mean temperature, with a slightly low mean daily range; a somewhat low mean rainfall, but falling on one day more than the average number; a very large excess of winds of moderate force, from a South-easterly quarter.

The mean height of the barometric column, reduced to sea-level and 32° Fahr., was 29·447 inches in October, 29·906 inches in November, and 29·684 inches in December. The mean temperature was 41°·7, being 0°·9 below the average for the quarter for the preceding ten years. The mean temperature was 47°·1 in October; 41°·5 in November; and 36°·4 in December. The absolutely highest temperature was 69°·0 in October, 58°·2 in November, and 57°·0 in December; and the absolutely lowest was 25°·0 in October, 15°·0 in November, and 11°·5 in December. Rain fell on 27 days in October, on 19 in November, and on 18 in December; the mean depth being 7·57 inches in October, 3·21 inches in November, and 3·39 inches in December. With observations of wind direction made twice daily, winds with an easterly point were reported 19 times in October, 8 times in November, and 23 times in December. Westerly winds were noted on 27 occasions in October, on 38 in November, and on 19 in December. Northerly winds were observed on 11 occasions in October, on 19 in November, and on 10 in December. Southerly winds prevailed at 30 observations in October, at 17 in November, and at 30 in December.

N.B.—Districts containing Parliamentary or Royal Burghs are printed in capitals, thus—EDINBURGH. Districts containing Police Burghs or Towns of 2000 Inhabitants and upwards are printed in small capitals, thus—CARLUKE. An asterisk "*" is prefixed to those Districts which have different names from the Parishes in which they are situated, or which comprise more, or parts of more than one Parish. The component parts of these Districts will be found on page 45.

A dagger "†" is prefixed to those Districts which consist of only a part of the Civil Parish of the same name.

SHOWING THE STATIONS

of the

SCOTTISH METEOROLOGICAL SOCIETY.

Reported to the Registrar General of Scotland.

W. & A. K. Johnston

NOTES ON THE NUMERICAL RETURNS OF SCOTTISH METEOROLOGY FOR THE QUARTER ENDING 31st DECEMBER 1903.

By Dr Buchan, under the Direction of the Council of the Scottish Meteorological Society.

These returns are founded on the observations made, morning and evening, at 60 of the Stations of the Scottish Meteorological Society, and have been prepared from the Observers' separate schedules.

From the individual results for each station, the following collective results have been obtained, assuming them to have been equally well observed, and to represent the whole country :—

COLLECTED RETURNS FOR ALL THE ACCEPTED STATIONS OF THE SCOTTISH METEOROLOGICAL SOCIETY, HAVING A MEAN LATITUDE = 56° 33′ N.; MEAN LONGITUDE = 3° 45′ W.; AND MEAN ELEVATION = 279 Feet.

* Returns for the individual stations having Sunshine Recorders are given on p. 62.

And when these results are compared with the averages of 1856–1900, during the same months, they show the following characteristics and differences :—

OCTOBER 1903—

Mean Barometric Pressure, 29·447 inches; less than the average of 1856–1900 by 0·365 inch.
Mean Temperature, 47°·1; greater by 0°·6.
Mean Daily Range of Temperature, 10°·7; less by 1°·3.
Mean Humidity, 87 per cent.; being the average.
Rain, Number of Days, 27; greater by 10 days.
Rain, Depth in Inches, 7·57; greater by 3·53 inches.
Wind, Mean Force (on Scale of 0–12), 2·6; less by 0·2.
Wind, Direction of, a 4 days' excess of winds from between S.E. and S.W.
Hours of Sunshine, *v.* p. 62.
Mean Amount of Cloud, 7·1; greater by 0·7.

NOVEMBER 1903—

Mean Barometric Pressure, 29·906 inches; greater than the average of 1856–1900 by 0·076 inch.
Mean Temperature, 41°·5; greater by 0°·6.
Mean Daily Range of Temperature 10°·7; greater by 0°·3.
Mean Humidity, 86 per cent.; less by 2·0.
Rain, Number of Days, 19; greater by 3 days.
Rain, Depth in Inches, 3·21; less by 0·63 inch.
Wind, Mean Force (on Scale of 0–12), 2·5; less by 0·3.
Wind, Direction of, a 6 days' excess of winds from W. and N.W.
Hours of Sunshine, *v.* p. 62.
Mean Amount of Cloud, 6·0; less by 0·5.

DECEMBER 1903—

Mean Barometric Pressure, 29·684 inches; less than the average of 1856–1900 by 0·096 inch.
Mean Temperature, 36°·4; less by 1°·6.
Mean Daily Range of Temperature, 8°·7; less by 0°·9.
Mean Humidity, 90 per cent.; greater by 2·2.
Rain, Number of Days, 18; greater by 1 day.
Rain, Depth in Inches, 3·39; less by 0·77 inch.
Wind, Mean Force (on Scale of 0–12) 2·1; less by 0·7.
Wind, Direction of; a 6 days' excess of winds from between E., S.E., and S.
Hours of Sunshine, *v.* p. 62.
Mean Amount of Cloud, 6·9; greater by 0·4.

OCTOBER 1903—

Hence the weather of OCTOBER 1903 was characterised by an abnormally low mean atmospheric pressure; a slightly high mean temperature, with a rather low mean daily range; an average mean humidity; an abnormally high mean rainfall, falling on 10 days more than the average number; a considerable excess of winds of moderate force from a Southerly quarter.

The mean barometric pressure was 29·447 inches, being 0·365 inch below the average, and much lower than any mean for October since observations were organised in 1856, the next lowest being 29·587 inches in 1872. At most places the pressure, reduced to sea-level, reached 30 inches only on the 18th, the extremes at Leith being 30·046 inches on the 18th and 28·849 inches on the 12th.

The mean temperature was 47°·1, or 0°·6 above the normal, the days being of average temperature and the nights 1°·3 above. In all Southern counties there was a well-marked excess, amounting at Edinburgh to as much as 2°·4, whilst north of the Forth and Clyde a few stations showed a deficiency, several had temperatures practically equal to the average, and only a few, such as Dundee and Ochtertyre, an excess of as much as 1°·0. The month opened with fairly high temperatures, the maximum for the month at most places being recorded on the 1st. A colder spell of weather followed, with lowest readings generally on the 10th, but thereafter variations were very slight and temperature remained almost continuously above the average except for low readings on 24th and 29th. At about one-third of the stations shade readings below 32°·0 were not recorded. Ground frost was frequently reported from Braemar, but was seldom noted at low-lying places, and occurred at Paisley only on the 10th, and at Edinburgh only on the 10th and 29th. The absolute maximum was 69°·0 at Haddo House on the 1st, the minimum being 25°·0 at Stronvar on the 10th.

The mean rainfall was 7·57 inches, or 87 per cent. above the normal, being the highest mean on record for October. South of a line drawn from the mouth of the Tay to Mull nearly every district reported considerably more than double the average amount, though at Cally (Gatehouse) there was an excess of only 54 per cent. The relative excess was less in northern districts, but at only two or three stations was it below 40 per cent. Only about two-fifths of the stations had a fall of less than 6 inches, whilst about one-fifth had a fall of more than 10, the heaviest falls being 15·71 inches at Lochbuie, 15·58 at Stronvar, 14·39 at Leadhills, 13·43 at Glencarron, and 12·46 at Fort-William. At Stronvar, Glasgow, Broomlands, and one or two other places, rain fell on every day of the month, whilst many places had only one or two rainless days, the average number of rainy days being 27, or no less than 10 above the normal. The wettest periods of the month were from 3rd to 8th, and from 24th to 29th. About half the stations reported a fall exceeding an inch on some one day of the month, the heaviest daily fall being 2·61 inches at Glencarron on the 15th, whilst at Edinburgh, Paisley, and other places the monthly average was exceeded by the aggregate of the first 10 days. On Ben Nevis the monthly amount was 18·66 inches, or 3·24 inches above the mean of nineteen years.

The month was abnormally wet and unsettled, the weather being especially stormy from 11th to 16th. Thunder was reported in the Border counties on 25th and 26th.

In the North an Aurora was observed on the 13th and again on the 31st. The occurrence on the 31st was of a very brilliant character, and was associated with a "magnetic storm" of great intensity.

NOVEMBER 1903—

Hence the weather of NOVEMBER 1903 was characterised by a somewhat high mean barometric pressure; a slightly high mean temperature, with a slightly high mean daily range; a low mean humidity; a somewhat low mean rainfall, but falling on 3 days more than the average number; a very large excess of winds of moderate force from W. and N.W.

The mean barometric pressure was 29·906 inches, or 0·076 inch above the normal. During the first eight days of the month pressure was decidedly high, at many places exceeding 30·5 inches at sea-level on the 5th and 6th. Lowest readings occurred generally on the 28th, the extremes at Leith being 30·558 inches on the 6th and 29·180 inches on the 28th.

The mean temperature was 41°·5, or 0°·6 above the normal, the days being 0°·8

and the nights 0°·5 above their respective averages. In Shetland, Orkney, and North-Eastern Coast districts temperature was below the average, but in nearly all other parts there was an excess, amounting at about a fourth of the stations to fully 1°·0. The month opened with readings much above the average, but low temperatures were recorded in Central and Southern districts from 6th to 8th, the sheltered minimum falling on the 7th to 24°·0 at Perth and 24°·9 at Edinburgh. Thereafter cyclonic conditions prevailed with higher temperatures, the maximum for the month generally occurring on the 12th. Again from 16th to 18th temperature was low under the influence of Northerly winds, and, after a few days of milder weather, the month closed with a severe frost, with lowest readings everywhere on the 30th, when the sheltered minimum fell below 20°·0 at Wolfelee, Stobo, Leadhills, and a few other stations. The absolute maximum was 58°·2 at Inverness on the 14th, the minimum being 15°·0 at Leadhills on the 30th.

The mean rainfall was 3·21 inches, or 16 per cent. below the normal. In Northern districts there was a decided excess, amounting to 66 per cent. at Wick, 53 at Dunrobin, and 24 at Inverness. At Fort Augustus and Fort William the monthly amounts were practically equal to the average, whilst at Braemar there was a defect of 47 per cent., and in all Central and Southern districts the month was a dry one. The defect was as much as 78 per cent. at Lednathie, and in most districts of the counties of Perth, Forfar, and Fife less than half the average amount was registered. In the Border counties the defect was more than 40 per cent., in the Lothians from 30 to 40, in the Clyde area from 20 to 30, whilst in the extreme South-West it was only about 10 per cent. The rainiest periods were the 1st and 2nd, from the 8th to 14th, and from the 21st to 28th. In the South-Eastern counties about a third of the monthly total was due to heavy falls on the 28th. The heaviest daily falls were 2·38 inches at Fort William on the 23rd, and 2·19 inches at Glencarron on the same day. On Ben Nevis the monthly amount was 17·27 inches, or 2·68 inches above the average

Snow fell in Northern districts about the middle and towards the end of the month, and on the 27th a snowstorm was general over the country. The weather was very stormy on the 21st and 22nd.

DECEMBER 1903—

Hence the weather of DECEMBER 1903 was characterised by a low mean barometric pressure; a low mean temperature, with a rather low mean daily range; a high mean humidity; a rather low mean rainfall, but falling on one day more than the average number; a very large excess of winds of moderate force from a S.E. quarter.

The mean barometric pressure was 29·684 inches, or 0·096 inch below the normal. Pressure was lowest from the 4th to the 11th, and highest towards the end of the month, the extremes at Leith, at sea-level, being 30·271 inches on the 28th and 28·888 inches on the 8th.

The mean temperature was 36°·4, or 1°·6 below the normal, the days being 2°·0 and the nights 1°·1 below their respective averages. Temperature was slightly above the average at Deerness, but everywhere on the mainland was below the average, the defect being less than 1°·0 at one or two places on the East Coast, between 1°·0 and 2°·0 at the majority of stations, whilst at Fort Augustus and Inverness it was more than 3°·0, and at Lairg as much as 4°·5. The 1st, 2nd, 5th and 6th were very cold days, and thereafter brief mild and cold spells alternated until the 24th, when a severe frost lasting until the end of the month became general over the country. Highest temperatures occurred almost everywhere on the 22nd, and lowest, except at one or two stations, on the 2nd or 30th. The absolute maximum was 57°·0 at Glencarron on the 21st, and the minimum 11°·5 at Kingussie on the 2nd and at Fort Augustus on the 30th.

The mean rainfall was 3·39 inches, or 19 per cent. below the normal. At Lednathie there was an excess of 44 per cent., and at Montrose and Perth of 12, whilst in Central Perthshire and Bute rainfall was just equal to the average. Elsewhere there was a deficiency, which in Southern Scotland increased from West to East and as regards the country generally was greatest in Northern districts. Thus Paisley was deficient by 7 per cent. and Greenock and Drumlanrig by 10, whilst in Midlothian only half, and in East Lothian less than half the average was registered. In the North, Glencarron and Lairg were deficient by 60 per cent. and Inverness by 70. At Dundee the deficiency was only 8 per cent., at Braemar 11, and at Aberdeen 17. The wettest days were 2nd, 7th, 13th, 21st and 22nd, and except on the East Coast but little rain fell after the 22nd. The heaviest daily falls reported were 2·00 inches at Greenock, 1·73 at Glencarron and 1·66 at Fort William, all on the 2nd, and 1·72 inch at Stronvar on the 21st. On Ben Nevis the monthly amount was 6·81 inches, or 12·30 inches below the average.

Snow fell in most districts on the 2nd and on one or two days thereafter. At Lednathie it was noted on 13 days and at Stobo on 6.

The weather was stormy on the 2nd, 3rd, 7th, and 21st, but in general the wind force was light, the month being marked, except in Northern districts, by dense land fogs and absence of sunshine. At Glasgow, sunshine was recorded only on the 1st; and at Paisley, fog occurred on 17 days.

Auroras were observed at Kingussie, Inverness, and Monach on 13th; Edinburgh on 18th; Ben Nevis on 25th; and Cape Wrath on 31st.

REGISTRARS' NOTES.

In compliance with the following Instructions, many of the Registrars have appended remarks to their Returns, from which the subjoined Notes have been selected. The Registrars alone must be considered responsible for the opinions which they express.

INSTRUCTIONS TO REGISTRARS.

"If, at any time, the Births (whether legitimate or illegitimate), the Deaths, or the Marriages registered during the Quarter have been above or below the average, here state what you consider to be the cause, and whether epidemics, such as Measles, Typhus, Cholera, etc., have prevailed in the District; or if there is any other fact in the character of the Weather, Sanitary or Social Arrangements, Movement of the Population, etc., which will account for the circumstance."

The Figures refer to the Numbers of the Districts in the preceding Tables.

I. NORTHERN DIVISION.

1. Shetland.

9. Sandsting and Aithsting. — The twelve deaths were of people whose ages ranged from 70 to 93, giving an average of fully 86 years.

2. Orkney.

26. Sanday. — Seven of the thirteen deaths were those of shipwrecked sailors, whose bodies were cast ashore in the district.

3. Caithness.

36. Dunnet. — Some cases of Scarlatina

occurred, but no deaths therefrom. Five of the six persons who died were aged over 70 years, the oldest being 99.

4. SUTHERLAND.

46 (1). BONAR.—A number of marriages of persons belonging to the districts were celebrated elsewhere.

II. NORTH-WESTERN DIVISION.

5. ROSS AND CROMARTY.

Mainland.

71 (1). KINCARDINE. — Three marriages of persons from the district were solemnised elsewhere during December.

81. ROSSKEEN.—One death from Diphtheria in December.

Insular.

86*b*. CARLOWAY.—Measles was the cause of many deaths during the year, but has now almost disappeared.

6. INVERNESS.

Mainland.

90*a*. ABERNETHY AND KINCARDINE.—Scarlatina of a very mild type was prevalent during the quarter, and the public school was closed in consequence. The disease appears to have been stamped out. The three deaths were of persons aged respectively 87, 80, and 81 years.

104. LAGGAN.—Of the eight deaths registered during the year, four were of persons aged respectively 78, 88, 88, and 90 years.

Insular.

119. STRATH.—One of the deaths was that of a seaman of the Royal Navy who was accidentally drowned.

III. NORTH-EASTERN DIVISION.

8. ELGIN (OR MORAY).

128 (2). INVERALLAN. — The death-rate for December was very high, but a large proportion was of persons over 70 years. Low temperatures prevailed.

131 (1). BURGHEAD.—Six of the nine deaths registered were of persons over 60 years. Of the five marriages in December, four occurred among the fishing population, on their return from the English herring-fishing.

9. BANFF.

149*a*. BOYNDIE.—Marriages for December were among the fishing population, who defer marriage till after the English fishing season.

155*b*. GLENRINNES.—For the first time since the district was erected 38 years ago, no events were recorded during the quarter. Over the whole year the birth-rate has been fully maintained, being equal to 3·5 per cent. of the population.

10. ABERDEEN.

172. AUCHINDOIR. — Four of the six deaths were of persons over 70 years, the oldest being 88.

188. DRUMBLADE.—The number of marriages for the year of parties belonging to the parish is slightly above the average, but the ceremony is now invariably performed in Huntly.

225. NEW DEER.—Two of the thirteen deaths occurred in Buchan Combination Poorhouse. Seven of the persons who died were aged over 70, the oldest being 94.

230. OYNE.—One of the three deaths was the result of a railway accident.

235 (2). INVERALLOCHY.—The eight marriages were all solemnised on the same day and occurred among the fishing population.

11. KINCARDINE.

254. BERVIE. — Measles prevalent; three deaths therefrom.

258 (1). FETTERESSO. — Four of the deaths recorded occurred in the Combination Poorhouse.

260. GARVOCK.—The two deaths registered were of children aged respectively eight months and three days.

262. KINNEFF AND CATTERLINE.—Only one marriage was registered during the year, but several inhabitants of the parish were married in other districts.

267. ST CYRUS. — Measles of a mild type prevalent; no deaths therefrom.

IV. EAST-MIDLAND DIVISION.

12. Forfar.

289. Glamis.—The illegitimate births include a case of twins.

298. Kirkden.—The only death recorded was that of a man aged 74.

13. Perth.

330. Auchtergaven.—The deaths of nineteen persons were registered during the year, of whom ten were over 70 years, three over 80, and one was over 90.

332. Bendochy.—The births for the year were more numerous than for several years past.

334. Blair-Athol.—The only death recorded resulted from drowning.

339. Clunie.—The average age of the eight persons whose deaths were recorded during the year was over 73 years. Only one marriage was registered in 1903, but there were seven proclamations.

14. Fife.

420. Cupar.—Of the deaths registered, twelve occurred in the Fife and Kinross Asylum.

430. Flisk.—A number of cases of Diphtheria occurred in October. The two deaths registered resulted from this disease.

440. Kinglassie.—Two of the three deaths were in the County Hospital and resulted from Typhoid Fever.

15. Kinross.

463. Orwell.—Three of the sixteen deaths occurred in the Ochil Hills Sanatorium.

V. WEST-MIDLAND DIVISION.

18. Dumbarton.

494 (1). Cardross.—One of the six deaths was of a person aged 103 years.

19. Argyll.

Mainland.

531 (1). Saddell.—Of the three persons whose deaths were recorded, one was aged 84 and another 94 years.

20. Bute.

557. North Bute.—Of the three females whose deaths were registered, two were aged 76 and the other 79.

VI. SOUTH-WESTERN DIVISION.

21. Renfrew.

566. Inchinnan.—The four births in October were two cases of twins.

569. Kilmalcolm.—Of the seventeen deaths registered, four were of Inmates of the Orphan Homes of Scotland, and ten were of persons over 60 years of age.

22. Ayr.

593. Galston.—The death-rate is much higher than for the corresponding quarter of last year. There are no epidemics, but the weather has been of an unsettled character.

613 (2). Catrine.—The births are above the average, being increased by the unusually large number of illegitimate.

23. Lanark.

625 (3). Bellshill.—Deaths above the average, owing to a slight epidemic of Measles. Many cases of Small-pox are now under treatment in the County Hospital in this district.

VII. SOUTH-EASTERN DIVISION.

25. Edinburgh.

674. Borthwick.—Two cases of Scarlet Fever occurred in one family.

677. COLINTON.—Of the ten illegitimate births registered, six occurred in Craiglockhart Poorhouse. Ten deaths have occurred in the new City Hospital since its opening, seven of these being certified as due to Diphtheria.

691. LASSWADE.—One of the deaths was of a person aged 93.

698*b*. STOBHILL.—Births below the average. Work irregular and a number of houses unoccupied during the year.

700. TEMPLE. — Death-rate for 1903 was exceptionally high.

701. WEST CALDER.—Death-rate high for the last two months of the quarter. The greater proportion was of persons aged from 50 to 80 years.

26. HADDINGTON.

717. PRESTONKIRK. — Of the eleven deaths registered, three were of infants under 6 months and six of persons aged 65 years and upwards.

27. BERWICK.

735. DUNS.—Measles and Mumps prevalent. Among the deaths registered is that of a woman aged 96.

737. ECCLES.—The four deaths registered were of persons aged respectively 60, 77, 81, and 89.

28. PEEBLES.

767. NEWLANDS.—Scarlet Fever is still in the parish, but no fatal cases have occurred.

772. TWEEDSMUIR.—An epidemic of Small-pox broke out at Talla Water-works in November. One death resulted.

29. SELKIRK.

773*b*. ASHKIRK. — During the quarter there occurred two cases of Diphtheria, four of Scarlet Fever (in one family), and one case of Small-pox, which was removed to Selkirk Hospital.

778. SELKIRK.—Two deaths from Small-pox.

VIII. SOUTHERN DIVISION.

31. DUMFRIES.

822. DUNSCORE. — Deaths greatly above the average, and mostly of aged persons. One death resulted from Hooping-cough, which is very prevalent.

826. GLENCAIRN. — Four of the five deaths were of persons aged respectively 76, 79, 83, and 85.

837 (2). SOUTHERN DISTRICT OF KIRKPATRICK-FLEMING.—Two of the seven deaths were of persons belonging to other parishes, who died in the Combination Poorhouse.

854. WESTERKIRK.—Only one death registered during the year, that of an infant 12 days old.

33. WIGTOWN.

894. OLD LUCE.—One of the deaths was that of a woman in her 98th year.

898. STONEYKIRK.—The deaths include those of a male aged 84 and a female aged 94.

* The actual number of Districts is 1073—many Parishes and Burghs having been divided into two or more Districts for the purpose of Registration. Thus Edinburgh and Glasgow, to each of which only a single number is assigned in the Tables, consist of 7 and 14 Districts respectively. In forming the alphabetical arrangement the principle adopted has been to place *compound* names in the order in which they are pronounced.
